ADvanced Container Handling - ACH

Born from a founder's genuine passion for handling all its forms – from containers (glass, shrink-packs, case, and beyond) to every item that needs to be packaged or simply handled across a production floor

ACH entered the industry not as another machinery supplier, but as a new way of thinking.

In most line integration projects, handling is designed last. By the time it enters the picture, the architecture is fixed, the margins are tight, and compromise is already built in. ACH was founded to challenge exactly that logic. At the core of ACH's mission is a shift in perspective: the container is not an afterthought – it's the protagonist.

Every project begins there, with the container itself: its shape, its material, its purpose – whether it carries a premium brand, reaches mass distribution, or serves a highly specific industrial need. These are not secondary considerations. They are engineering brief. ACH exists to develop solutions that are purpose-built rather than adapted-technically advanced systems configured around the actual problem, not around a standard catalogue.

Whether the project calls for a targeted modification, custom configuration, or fully integrated automated line, the approach remains the same: no inherited assumptions, no off-the-shelf compromises.

The philosophy behind this is straightforward, and deliberately so: what matters most to the customer matters most to ACH. That principle drives every decision, from the first conversation to final commissioning – and it is what makes genuine tailor-made solutions possible, rather than just promised.

Building on this vision and deep hands-on experience, ACH moves fluidly from initial design consultancy – providing honest technical assessments and direct recommendations, with the sole aim of setting each project on solid foundations and realistic expectations – through to engineering, manufacture, and full system integration, always focused on maximizing performance, efficiency, and long-term value.

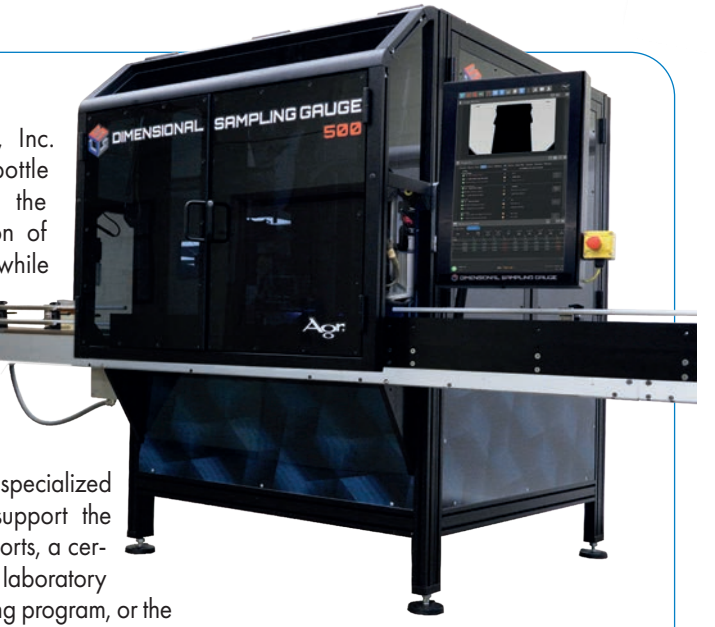
Glasstec

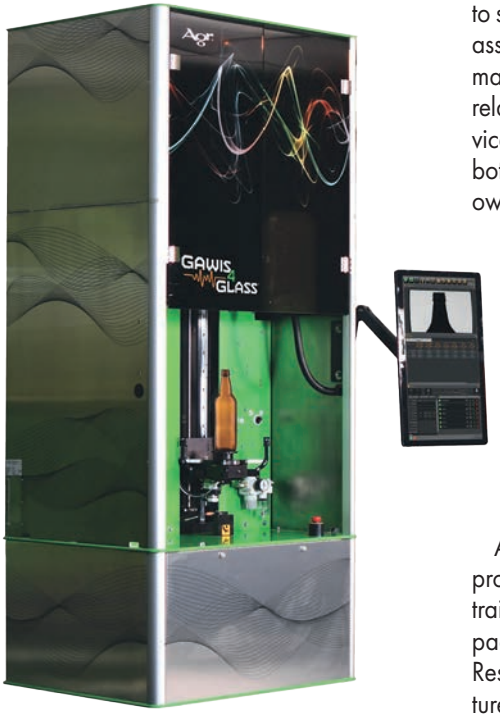
Düsseldorf, Germany - 20/23 October



Agr International, Inc. partners with glass bottle manufacturers around the world in the production of high-quality containers while improving efficiencies, reducing costs and contributing to the responsible management of resources.

Whether in need of specialized testing equipment to support the quality of production efforts, a certified and independent laboratory to supplement your testing program, or the assistance of expert consultants to better manage container filling and packaging related problems – Agr products and services are uniquely designed to assist glass bottle manufacturers as well as brand owners.

Facilitate sustainable production while ensuring the highest quality container possible with Agr's newest innovation, the DSG500, offering automation and digitalization like never before. With hands-free dimensional and thickness measurement, the DSG500 helps identify process trends using predictive maintenance and data analytics, improving the productivity of your overall quality management program. The sampling gauge now comes standard with AutoJob®, job creation in seconds, providing optimized consistency and throughput.



Gawis4Glass, Agr's latest innovation in dimensional measurement, brings unmatched accuracy and repeatability into the glass lab. Featuring AutoJob, it can analyze and identify finish features in a matter of seconds—eliminating tedious and time-consuming job setup. The slick and intuitive user interface allows users to quickly access Gawis4Glass' powerful tools to make dimensional measurement quick, easy, and accurate. The system is also available with a robotic autofeed option to further enhance productivity and throughput.

Agr's product offerings for the glass industry consist of equipment for the production line and the laboratory including automated gauging, sampling systems, and products for coating measurement, pressure testing, strength testing, volume measurement, and dimensional measurement.

Agr's American Glass research division provides a host of specialized consulting, training, and analytical services for glass packaging. Experts from American Glass Research work with container manufacturers and fillers to lightweight and optimize containers, improve quality and productivity, and offer specialized testing services as well as training to industry personnel worldwide.

Agr International is a fully integrated supplier from analysis to conceptual design to engineering, manufacturing, installation, training, and support. Agr maintains a worldwide operation with its headquarters in Butler, Pennsylvania USA and satellite offices in Italy, Germany, Spain, Mexico, Thailand, and China.

ALL GLASS S.r.l. came into being at the end of the 1990s in the heart of the Po Valley and, on the strength of the know-how of its founders, the company has quickly specialized itself in the COLD-END sector, becoming an important national and international supplier to major producers of hollow glass.

Thanks to continuous requests from the market, All Glass has studied, designed and supplied a great deal of equipment that has been standardised and customised to make it increasingly effective and performing as per the end user's specific requirements.

All Glass places itself on the market as a unique interlocutor able to propose complete solutions, starting from the surface treatment of items on the tempering (hood) up to the palletising and also wrapping/thermal shrinking phases of finished products.

The company's strong focus on continuous improvement with a view to being a 360° active partner for its customers has allowed All Glass to complete its already wide range of equipment with the integration of AGV vehicles and Automated Warehouse systems, succeeding in offering increasingly innovative solutions for storage management and shipment of finished products.

A solid commercial partnership with companies which are leaders in the AGV and Automated Warehouse sectors, has allowed us to merge our respective know-how in order to guarantee advanced technology and customised solutions for our customers.

All Glass is able to offer proven professionalism and a high level of technical/commercial service in any country in the world where there is a need to innovate, build and implement major new projects.

To give strength to these important prerogatives, the company has a surface area spanning approximately 40,000 square metre used exclusively for the production, assembly and testing of equipment.

Improving Glass Container Inspection Since 1997

Antares Vision Group has developed technologies at the heart of glass container inspection for over 25 years. With dozens of active patents covering decades of innovation, we know precisely what customers want from their machines.

Plant managers, quality controllers and process engineers are challenged to deploy efficient solutions for automatically rejecting nonconforming glass containers. Worldwide, we're counted on to maximize operational efficiency and streamline the integration of inspection systems in some of the largest container-making facilities.

Our full portfolio of machine vision systems can deliver a package of benefits to your plant including:

- **Non-contact stations**—significantly reduce product breakage and allows for greater line speed
- **360° inspections**—identify defects without reorienting containers
- **Self-learning software**—pinpoint problem areas with no extra programming needed
- **Leading-edge optics**—all LEDs and color cameras hand-picked for premium performance
- **Flexible platforms**—machines built and programmed for specific needs.

Our machine vision systems are engineered to optimize your defect detections regardless of embossing, the color of the glass or container thickness. Areas of defect inspection include:

Baffle marks • knurled areas • dip and saddle • check • vision plug • MNR • line over • over press • wire edge • blisters • chipped finish • crizzled finish • stones • seeds • and many other defects

Stop Compromising. Start Optimizing.

All glass container defects compete for the optimal lighting geometry within an inspection station. Often users are forced to compromise—as the tar get defect is emphasized, others become harder to see. Volcano® Glass Inspection Systems solve this problem while performing at full line speeds.

Advantages of the Volcano systems include:

- Perform complete container inspections with greater accuracy
- Detect even the most problematic checks
- Reduce time-consuming machine setup and changeover
- Help pinpoint the root cause of defects
- Eliminate costly false rejects and wasted material.

Your inspection system should make no concessions for different types of defects. With Volcano, you can implement virtually any inspection sequence your plant requires.

BDF Industries is a manufacturer of technologically **advanced hollow glass production plants** where performance and innovation melt together in an everlasting pursuit of excellence.

We design and build every part and equipment with passion, giving safety and quality the highest priority while combining engineering skills with technological research. Our purpose is to go beyond standards and think «out of the box», to continue to satisfy our customers' needs in terms of performance and services. We offer the best plants and equipment solutions, serving various markets such as food & beverages, perfumery, cosmetics and pharmaceuticals. Plants are studied to ensure high performances and designed in accordance with customer specifications. From its headquarters in Italy, to its offices in Croatia and the USA, BDF Industries' worldwide presence has it working with clients in more than 80 countries, thanks to the company's ability to encounter any client's needs. All this makes BDF Industries a reliable and proactive business partner that is committed to respond to customers' requests.

FURNACES & CONDITIONING FOREHEARTHS

BDF industries Melting product line includes complete glass melting and conditioning technologies to design a complete range of products. It also includes relevant equipment like oil and gas burners and firing system, air and exhaust reverse valve, batch chargers. Thanks to **Scada system** we are able to provide real-time analysis and integration fully to realize the principles of **Industry 4.0**. Our camera control system and **BDF E.A.G.L.E. 3.1** AIR Enhanced Absolute Glass Level allow us to measure glass level through optical reflection.

IS FORMING MACHINES

BDF Industries' is able to provide a wide range of IS machines with a high level of **production flexibility**. From machines with **pneumatic handling** to **servo-assisted handling machines**, to **angular** or **parallel** mould openings/closures. The technical specifications available are:

SOLVING QUALITY PROBLEMS IN YOUR GLASS SINCE 1998

Since 1998, **Bohemi Chemicals** has been supplying hot- and cold-end coatings for glass bottles with a main focus on quality. If you encounter problems in the quality of your glass, such as scratches, white spots or blocked spraying system filters we can solve them as we have already done for many manufacturers all over the world.

HOT END COATING

STARTIN S

Monobutyl trichloride
Longer expiration date due to double stabilization.
Capable of closing the microfractures present in the glass.

COLD END COATING (High Quality)

BOHEMI P4218 D

Polyethylene emulsion.
Recommended for beer and wine bottles.
Avoids the formation of residues in filters, pipes and solenoids.

COLD END COATING (Very High Quality)

BOHEMI P1500

Copolymer and Waxes emulsion.
Suitable for precious bottles as liquor, champagne or returnable containers to be sterilized.

We supply nearly 100 customers all over the world in every continent.
All our products have food contact approval: Tuv Nord and Reach Certification. We offer free trials of all products to permit exhaustive test campaigns.

The clear ambition of the **Bottero Group** is to be a leading figure in the glass industry. The concrete and reliable nature of the company has generated with time a mixture of competitive peculiarities in technological innovation, in product performance and in the integration of new products and solutions.

This goal is confirmed by the high number of industrial patents in its possession, by its strong expansion and by the appreciation with which the market acknowledges it.

Bottero is a global leader covering all sectors of the glass industry: hollow glass, flat laminated and monolithic glass, solar, engineering, EPC projects.

Bottero offers a wide range of reliable product, thanks to over 60 years of market experience. It is the result of continuous investment in research and development.

Bottero's capillary network of sales and assistance allows us to fully meet the needs of our customers and to offer them constant assistance during the whole life of the product.

Bottero exports 90% of its production.

A position which Bottero has gained thanks to its capacity of knowing how to seize the commercial opportunities offered by various markets as well as opportunities in production, technical and project development, offered by different countries throughout the world.

This is why Bottero is present with its sites both on a national and international level, representing a constant reference point for customers, with organized and efficient structures.

COMPANY VISION

Continuity, Innovation, Quality and Customer Care are the values upon which Bottero has always founded and consolidated its development.

Continuity: For over 60 years Bottero develops machines for the glass industry. An uninterrupted reference point in constant growth, offering state of the art products and solutions to the world market.

Innovation: The company has always been on the lookout for new technological solutions. Project designers, developers and technicians work constantly to keep improving our products and to reach an ever higher operational level of the solutions we offer you.

Quality: Constantly inspecting the sturdiness and reliability of its products allows Bottero to maintain high quality and professional standards. This characteristic is much appreciated by whoever is seeking a solid and concrete partner for development in the glass market.

Customer Care: To be a Bottero customer means counting on a company which is always aware of their needs. A dense marketing and assistance network on a worldwide level allows us to be ever at their side both when purchasing our products and during their whole production life.

Our Hollow Glass business unit is the **world leader** in control systems for **forming machines** for any kind and size of glass container thanks to real-time simulation of the entire process and the application of **artificial intelligence (AI)** and machine **machine learning (ML)** algorithms.

We are leader in forming process

Thanks to the Forming Engineering team, Bottero offers a complete service for process definition, control, optimization, simulation, and container weight reduction.

Our offer to the final customer includes the design and realization of **EPC turnkey factory (Engineering, Procurement Construction)**, the supply of IS machineries and the automation of the entire forming process, including the quality and weight control in real time of every glass container.

BOTTERO

E2Pack
EASY TO PACK SOLUTIONS

Bottero integrates in E2Pack the intellectual property and know-how of the historical packaging leaders Zecchetti, Emmeti, Mectra, Sipac and Logik, offering a complete product portfolio for the hollow glass manufacturing from feeders through IS machines to final packaging.
State-of-the-art solutions span through AI driven feeders through full servo IS machines, closed loop process control, integrated hot and cold end, robotic unwrapping.

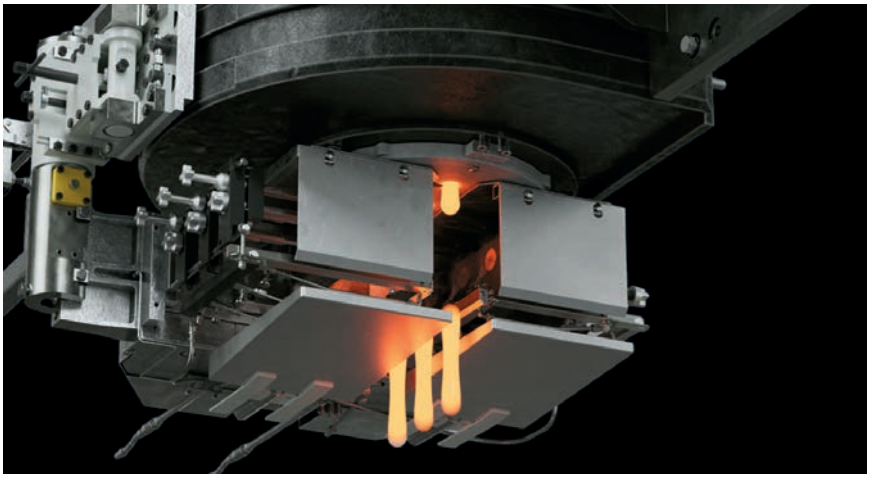
FleXinspect C Gen III

As the world's leader in equipment, services, and technology solutions, Bucher Emhart Glass continually sets new standards for glass container production efficiency and flexibility. Offering the widest array of products available, Bucher Emhart Glass is able to meet the requirements of glassmakers around the globe.

Smartfeeder



Forming Machines

For almost a century, Bucher Emhart Glass has defined glass container forming. As an industry leader, we deliver cutting-edge technology and a full hot-end portfolio—engineered for performance, flexibility, and continuous innovation: The portfolio includes:

- IS 4 1/4" SG, 4 1/4" DG
- IS 5" SG, 5" DG, 85mm TG
- IS 5 1/2" SG, 5 1/2" DG
- IS 6 1/4" SG, 6 1/4" DG, 4 1/4" TG
- AIS-M 6 1/4" DG, 4-1/4" TG
- AIS Quad QG 3", 4-1/4" TG
- AIS-K SG, 6 1/4" DG
- NIS 5" TG, 95mm QG, 6 1/4" DG

Automation and Data Traceability

Digitalization is clearly shaping the future of glass forming. In the next-generation glass factory, forming operations will be autonomously managed and optimized by smart technologies, with little to no need for manual input. This is our end-to-end (E2E) vision of full process excellence. Bucher Emhart Glass' current offering already features controls with the latest FlexIS4, the Advanced Data Interface for data collection, the FlexRobot for automated blank mold swabbing, closed-loop systems, and the ID Mark+ solution for traceability.

Inspection Systems

Bucher Emhart Glass provides quality assurance solutions designed to meet almost any inspection requirement. The "Total Choice" portfolio includes the FleXinspect family, featuring highly precise mechanical and vision inspection machines to deliver the most modern, accurate, and reliable inspection performance.

Lifecycle Solution

As partner to the glass container industry, Bucher Emhart Glass offers a full range of services to help customers enhance their performance. These include project engineering and execution (enhanced by the acquisition of cm.project.ing GmbH), Operational efficiency, Performance development, Modernization & upgrades, Original Parts and Lifecycle Technical Service agreement. We also offer Training & Development at customer sites and in our own training facilities: Windsor CT (USA), Sundsvall (Sweden) and Munich (Germany).

- **TEMPERING LINES**
- **ANNEALING AND DECORATING LEHRS**
- **MOULD PRE-HEATING OVENS**
- **CROSS CONVEYORS**
- **SCRAPERS**
- **STACKERS**

Since 1965 **CAR-MET** has been working in the glass industry supplying technological machinery. During these years CAR-MET has gained experience, knowledge and enhancements in glass production thanks to its skilled personnel. The company's internal workforce is dedicated to the engineering and manufacture of machinery such as:

- Annealing lehrs for containers and special glasses
- Decorating lehrs
- Lehrs with double belts
- Toughening lines on belt and spindle
- Mould preheating ovens
- Cross conveyors
- Stackers with two and three axes
- Brushes for all lehr types
- Hot glass scrapers
- Lehrs for special purposes

All machinery is manufactured entirely at CAR-MET's premises, in the north-east of Italy. Our services for clients include the pre-testing and inspection of machinery before delivery.

Annealing and decorating lehrs are among the best known products of the company; research and development is the guarantee that our technology is continuously evolving.

Gas or electrical heated lehrs are manufactured by means of modular design. The burners installed on the lehrs are patented by CAR-MET, adapted to almost any type of gas. Size and configuration of each lehr is based on the space available for the installation and type of production. Heating and cooling systems installed have been developed in accordance with European energy-saving regulations; which reduce operating costs in energy consumptions.

Attention to the environment is not only the reduction of energy consumption but also controlled emissions of exhaust fumes. A new technology of heat exchangers and radiant tubes has been developed, manufactured and installed by CAR-MET to the satisfaction of clients. This indirect heating technology is widely used in decorating processes to ensure the best results in final product quality.

Numerical controlled automation is being introduced to glass mould production by Italian welding equipment supplier **Commersald Impianti**. This task remained dependent on the manual application of spray-fused canisters and powder products long after other aspects of the manufacturing process had been automated. Commersald Engineering believes that its Robo series of workstations can perform all the necessary functions of manufacturing and repairing moulds and other glassmaking accessories. The welding equipment, complete with torches and power supplies compatible with various movements, designed and manufactured entirely by Commersald Engineering, can be selected according to needs. It is available in various configurations and with power ranging from 200-400A.

All these work centres are managed by numerical control (NC), with dedicated software for both management of movements and for welding para-meters. Programming meets the ISO standard, the same as normal NC machines for removing shavings.

The plants have the following characteristics:

- a torch with a copper tapering nozzle able to work in 200A continuous cycle on moulds and accessories of all dimensions for the glass industry, with constant penetration on the whole profile;
- 80kg max surfacing moulds, with pre-heating of pieces at temperatures up to 300°C for cast iron moulds and 400°C for bronze moulds;
- 20mm-thick metal structure, arc welded, quench and tempered steel with machined locator tables;
- programming simplified by the use of icons and windows.

All this equipment can be accessorized with Commersald Engineering Induction Heating Units **HEAT 6-25** Kw for correct, fast, precise and economic pre-heating of the pieces.

Commersald Group's KOY trademark is one of the most complete, well-known and used lines of welding materials and **PTA powders**, in particularly in Europe. The quality sales system of the group's welding consumables has been certified EN-ISO 9001:08 as a further warranty of excellence of its products. Commersald Group's range of PTA powders includes specific Ni/Co/Fe grades for the glass industry with different hardness and with specific features for cast iron, bronze or steel moulds.

Commersald is proud to be a leading European supplier of **Plasma Transferred Arc** equipment while focusing on developing new products and improving its machinery in each and every aspect. It also places emphasis on the assistance it provides, often external, for customers. This includes customizing machines for their specific requirements.

DMA Maschinen und Anlagenbau GmbH & Co. KG is a high-performance company specializing in special-purpose machinery and plant engineering. Its core focus is on the development, design, and manufacturing of individual, customer-specific solutions for industrial applications. Projects are managed holistically—from initial planning through implementation to commissioning.

A particular emphasis is placed on the glass sector, where DMA develops and produces tailor-made machines and systems for the processing, handling, and treatment of glass. The portfolio includes, among other things, solutions for transport, handling, and automation processes within the glass industry.

The range of services is complemented by comprehensive support such as maintenance, servicing, and technical assistance, ensuring high system availability and long-term customer satisfaction.

Here's what you can expect from us:

- Top-notch products: high-quality
- durable conveyor systems, "Made in Germany"
- Customized solutions for businesses of all sizes – from small and medium-sized enterprises to industrial conglomerates All-inclusive
- worry-free service
- Consulting, planning, direct delivery, and support: everything from a single source
- Modular system Integration of conveyor technology into your production, optionally piece by pieceCost

Savings: low maintenance requirements, professional repairs, fast spare parts delivery

EME is a world-leading batch and cullet treatment systems specialist. After more than a century of improving batch plants with tailored solutions, we are a customer-centric partner dedicated to designing, constructing and enhancing batch and cullet plants using the best technology available. Since 1987 EME has been an integral part of the wider SORG Group.

Technology

EME has the perfect solution for glassmakers looking to use state-of-the-art technologies in their process – from batch plants, cullet handling and batch charging to machinery, special applications and automation.

Services

We deliver tailored processes and technologies, upgrade batch plants and supply comprehensive and straightforward software to allow our partners to have a competitive advantage and produce the best batch globally.

Lifetime Support

To keep batch plants efficient and reduce maintenance requirements EME offers its customers lifetime support, including technical assistance, parts, training, audits, condition monitoring and performance optimisation.

Sustainability

Having designed, commissioned and supported some 250 glass production facilities across the world, we are committed to delivering batch plants that perform and endure like no other.

Innovation

For over a century we have thrived by creating pioneering technologies and innovations in the design and engineering of batch preparation plants, cullet handling equipment and batch charging technology.

FURNACES AND SOLUTIONS FOR MANUAL ARTWORK GLASS PRODUCTION (by Falorni Glass)

falorniglass
art glass solutions

Falorni Tech, today, operates both as a main contractor in EPC projects and as a partner in the case of reconstructions of existing plants. Starting from the conceptual engineering proposal, Falorni Tech undertakes projects in the glass fields from the initial definition phase up to post-commissioning assistance. A unified workflow from initial conception to completion, combined with teamwork, innovation, and problem solving. The main advantages of choosing Falorni Tech are the expertise and experience in glass melting technology and the glass production process (hollow glass, fiberglass, float glass, specialty glass). Falorni Tech provides melting furnaces, glass conditioning technology and all related services, equipment and infrastructure.

MACHINE RECONDITIONING

Famor Engineering offers reconditioning services for any forming machine, including presses, press/blow, blow/blow, and IS machines.

This service can be performed directly at our facility or at the customer's facility using suitable equipment and specialized technicians.

Famor Engineering, established 1977, is known for its intensive technical support to glassworks. Famor develops and provides machines, handling systems and feeders especially for the hot forming area of the hollow glass manufacturing process. Since its beginning, Famor has been specialized in prototyping and overhauling of glass forming machines, still carried out at present, thus contributing to industrial sustainability and providing cost efficiency for numerous glassworks. Famor's in-house machine shop guarantees precision in both parts manufacturing and fast deliveries.

TOOLS, EQUIPMENT & ACCESSORIES

Famor manufactures and sells Putsch-Meniconi brand glass tools. The well-known tools and shear blades of Putsch-Meniconi are now part of the FAM product range, represented by Famor's sales team. The portfolio also covers gathering robots, burners and moulds. The parts and tools warehouse has been transferred to Famor premises at Rivalta-Torino.

After development and tests, FAM BURNERS offers a large selection of Gas/Oxygen burners for different uses in glass production.

Mastering versatility to Honor the Italian Engineering

At this year's Glasstec Exhibition in Düsseldorf, Fermac is proud to celebrate the rich tradition of Italian engineering excellence. For over three decades, the company has maintained an unwavering commitment to versatility, flexibility and high-performance technology – qualities that continue do define its global footprint today.

Historically the high-quality machinery manufacturing sector has been a cornerstone of the Italian Economy. This is the precise arena where Fermac, a family-owned company has expelled for more than 30 years to come. Rooted in the Food Valley of Parma, Fermac has established deep traditional roots in developing and manufacturing advanced printing technologies. Today the company serves an array of diverse sectors including:

Beverage & Tableware; Beauty & Cosmetics; Pharmaceuticals & Homeware.

Ever since its foundation, Fermac is committed to mirroring and to shaping global decoration trends. Over tha last three decades, its printing systems have mastered a variety of subtrates including: Glass – Plastic – Ceramic – Metal with successful installations worldwide. Fermac Equipments drive high-speed production for different shapes, ranging from intricate spirit bottles and tumblers to luxury cosmetic jars, candle holders, flowerpots and many more.

Ergonomic Design for Sustainability

The previous Glasstec Edition in 2024 saw the debut of the pioneering FxxS Series, codenamed the "**Black Widow Machine**". Fermac has successfully transitioned this machine from a standalone unit into a comprehensive production ecosystem. Engineered primarily to meet the evolving demands of the cosmetic and perfumery markets, the FxxS Series is designed from the fround up to reduce environmental impact across all decoration sectors.

Modern packaging brands increasingly demand innovative geometries, tactile 3D effects and complex surface data such as manufacturer details, substrate compositions, and variable SKUs. The FxxS series addresses these needs through a meticulously engineered platform-free carousel design. This configuration provides operators with unrivaled access to printing stations, significantly minimizing changeover and maintenance downtime.

Robotic Arms for seamless loading and unloading of the items take charge of a decoration speed that exceeds **85 pieces per minute**. The next-generation UV LED curing system **drastically lowers energy consumption**. To achieve flawless finishing, the machine seamlessly integrates Fermac's extensive equipment and accessory portfolio including:

Integrated flaming and standalone pre-treatment systems, Antistatic and container-inflating systems, Lehr stacker systems and bottom/body registration cameras, as well as integrated quality inspection cameras.

Fima Olimpia Fonderie is located in Tuscany, a few kilometers from San Gimignano (SI).

It is a foundry producing castings in special cast iron for glass moulds. Thanks to highly technological production facilities and advanced control instruments, the company offers the market high quality products at competitive prices.

The company's logistic and technical organization enables Fima Olimpia to provide fast solutions in productive terms, as well as in customer service.

Fima Olimpia Fonderie is a customer-oriented company which has client needs as its priority - from small to larger companies.

The company concentrates on research and development in order to offer the highest quality products and has had ISO 9001 certification since 1997.

Fima Olimpia Fonderie employs over 50 people and offers its clients:

- more than 60 years of foundry experience
- all the new technologies in terms of design and production of moulds
- new plants in order to have the maximum productive capacity
- 14 different kinds of special cast iron that enable the satisfaction of all customer needs
- a modern analysis laboratory that gives us the capacity to monitor production constantly
- high speed deliveries within 7 days from the date of the order to all European countries
- competitive prices on international markets.

Environment Resources
Territory protection is a matter of sustainable development and environment conservation is one of our priorities. The new photovoltaic solar system is one of the last investments done in full support of "green" production.

COMPANY FOUNDED

1956

Fluorital is a dynamic, family owned and run company with its main plant located in Italy near Venice.

With more than 30 years of experience in the research and production of organic paints and silk-screen inks for glass decoration, Fluorital produces different types of spray paints, roller varnishes, and screen printing inks: UV-curable and solvent-based inks. The application fields of its products include perfume and cosmetic packaging, wine and spirit bottles, tableware, flat glass for furniture and interiors, and lighting glass.

All products are lead- and heavy metal free, and can be applied directly onto glass, as they do not require any primer.

All products are curable at low temperature or, when specified, with UV lamps, enabling important energy savings compared with other products.

The physical and mechanical resistance of Fluorital's products to the most severe tests required in the different market fields makes them the top reference on the market.

Fluorital invests considerable resources in Research and in its laboratories; besides the continuous update of more consolidated products, research is aimed at developing new finishings and products with even more efficient resistance, and environmentally friendly characteristics.

Currently, as an alternative to vacuum metallization, Fluorital is introducing a simple, low temperature spray metallization process that can be run on most standard decoration lines.

Fluorital supplies top quality products to colour your imagination.

More than 60 years serving glass making!

Since 1961, **Fonderie Valdelsane** has continued to strengthen its specialization in research, production and services for the worldwide hollow glass sector.

The company's experience has led it to constantly improve the ability to understand the needs and demands of the market.

Fonderie Valdelsane was a pioneer in the development of innovative materials for glass industries, with alloys that have become real references - such as **K 250** - for mould production all over the world, and the company is still holding its leadership position through continuous investments in research, human resources, digitalization and advanced technologies, driven by sustainability principles.

Great commitment is made for the reduction of environmental impact.

In 2024, the installation of solar panels with a capacity of 1.6 MW was completed and new technologies are developing for recycle purposes.

To date, Fonderie Valdelsane can boast of the membership to **Carbon Neutrality Area.**

Their materials mean **performance, efficiency, time & cost reduction** for both mould makers and glassworks.

The services reserved to its partners are entirely customized as per their specific needs.

What Fonderie Valdelsane offers:

- 100% production for the **glass sector only**;
- Catalogue of standard materials including **18 types of cast irons** and **3 types of specific copper alloys** for glassmaking moulds, neckrings and accessories;
- Repeatability of casting quality, thanks to fully automated facilities;
- Daily production capacity: **80 tons for cast iron and 10 tons for bronze**;
- ISO 9001, ISO 14001 and EMAS certification for the whole supply chain, including production, service and respect for the environment;
- **Multiannual Investment Plan for bronze casting**: production of copper alloys has been developed for years, gaining great appreciation from the glassworks.
- **Fast delivery**: up to 5 working days from order;
- Shipment to final destination, thanks to a fleet of 5 trucks and strong partnerships with reliable freight forwarders for out-of-EU deliveries;
- **Internationally registered trademarks** for K 250 alloys and traceability of each mould set, with official certificates;
- In-house UE certified laboratory;
- Internal design department, equipped with CAD/CAM programs and CNC machines;
- Accurate control systems for chemical and physical conformity;
- Certified carbon neutral region;
- Enthusiastic and proactive approach facing any new challenge.

FONDERIE VALDELSANE - EASY TO CHOOSE.

Glass Service is the preferred choice of customers seeking innovative and customized glass furnace solutions, meticulously designed, built, and installed by engineers with extensive expertise in the global glass industry.

Founded in 1994 through the merger of two companies, each boasting more than 20 years of experience, Glass Service initially served the world-renowned glass companies of Murano and Venice before swiftly expanding its operations throughout Italy and across the globe.

What sets Glass Service apart is its comprehensive and unique approach to glass melting technology. The company takes into account the entire supply chain during the design process, ensuring longevity and optimal performance for all its products. As a one-stop shop, Glass Service offers a range of in-house services, including financing, raw material analysis, glass defect analysis and troubleshooting, furnace and equipment installation, furnace pre-heating, and start-up — all adhering to stringent ISO 9001 and ISO 45001 safety standards.

As a team of dedicated engineers, Glass Service brings decades of experience, agility, manufacturing capabilities, and a profound passion for every project undertaken, whether it is a single product or a full turnkey plant. The company works closely with its customers, providing extensive staff training, dedicated customer support, and comprehensive after-sales assistance.

Glass Service's commitment to excellence, combined with deep industry knowledge, makes it the ideal partner for customers in the glass industry seeking cutting-edge solutions and unwavering support at every stage of their projects.

GLASS MELTING TECHNOLOGY DIVISION

- Automatic and semi-automatic batch plants
- Cullet recycling plants
- Day tanks and pot furnaces
- Recuperative unit-melter melting furnaces
- End port regenerative furnaces
- Electrical boosting systems
- Electrode holders
- Electric furnaces
- Natural gas heating forehearths
- Electrical heating forehearths
- Colouring forehearths with frit dosing system
- Batch chargers
- Heat recuperators for day tanks and unit-melter furnaces
- Automatic level control machines with platinum probe or radar model
- Stirrers and stirring machines
- Bubbler tubes and bubbler control skids
- Process control boards
- Combustion skids — natural gas, heavy oil, oxygen, hydrogen
- Melting burners, forehearth burners — furnace preheating and commissioning

We are Glass People – Heye International

This stands for customers' satisfaction, our experience in glass and for the glass experts at Heye. With passion and commitment we want to ensure highly cost-effective, sustainable and safe operation of glassworks worldwide; and thus further strengthen the position of glass as the packaging material of the future. Emerging from glass manufacturing, we have been developing efficient solutions for decades. We set standards in the container glass industry, significantly contributing to our customers' success. Thus, we make a positive impact on the environment and health, fostering a sustainable future. Today. Tomorroy. Together.

At its location in Plößberg, Germany, **HORN Glass Industries AG** designs and makes glass melting technology and turnkey projects for the float and container glass industries. The company's high-performance glass melting furnaces and turnkey projects are installed at glass manufacturers all over the world and serve the production of beverage bottles, food containers, drinking glasses, glass panes, glass tubes, glass fibres and special glass.

With more than 140 years of experience, HORN has been the specialist and expert in the field of the construction of glass melting furnaces for many years, and is now one of the industry leaders in the implementation of turnkey projects.

Subsidiary companies in China, Malaysia, India, Croatia, Brazil, Ukraine and the Czech Republic add value to global customers, offering proximity and prompt response in the global market. Almost 90% of HORN's products are exported from Plößberg in Upper Palatinate to more than 75 countries worldwide.

HORN offers its customers complete support and a helping hand at all times. HORN can offer tailor-made solutions because we have a very high level of vertical integration for all our products.

HORN has ventured into unknown areas, e.g. in the construction of its own tin baths and associated equipment. HORN manufactures a large number of products in its workshops in Plößberg:

- Glass melting furnaces (container glass, float glass, etc.)
- Tin baths
- Batch chargers
- Stirrers
- Gas, oil and heavy oil heating for melting furnaces
- Tin bath equipment such as top roller, pusher, flags, fences
- Tweel
- Dross boxes
- Shield gas supply stations

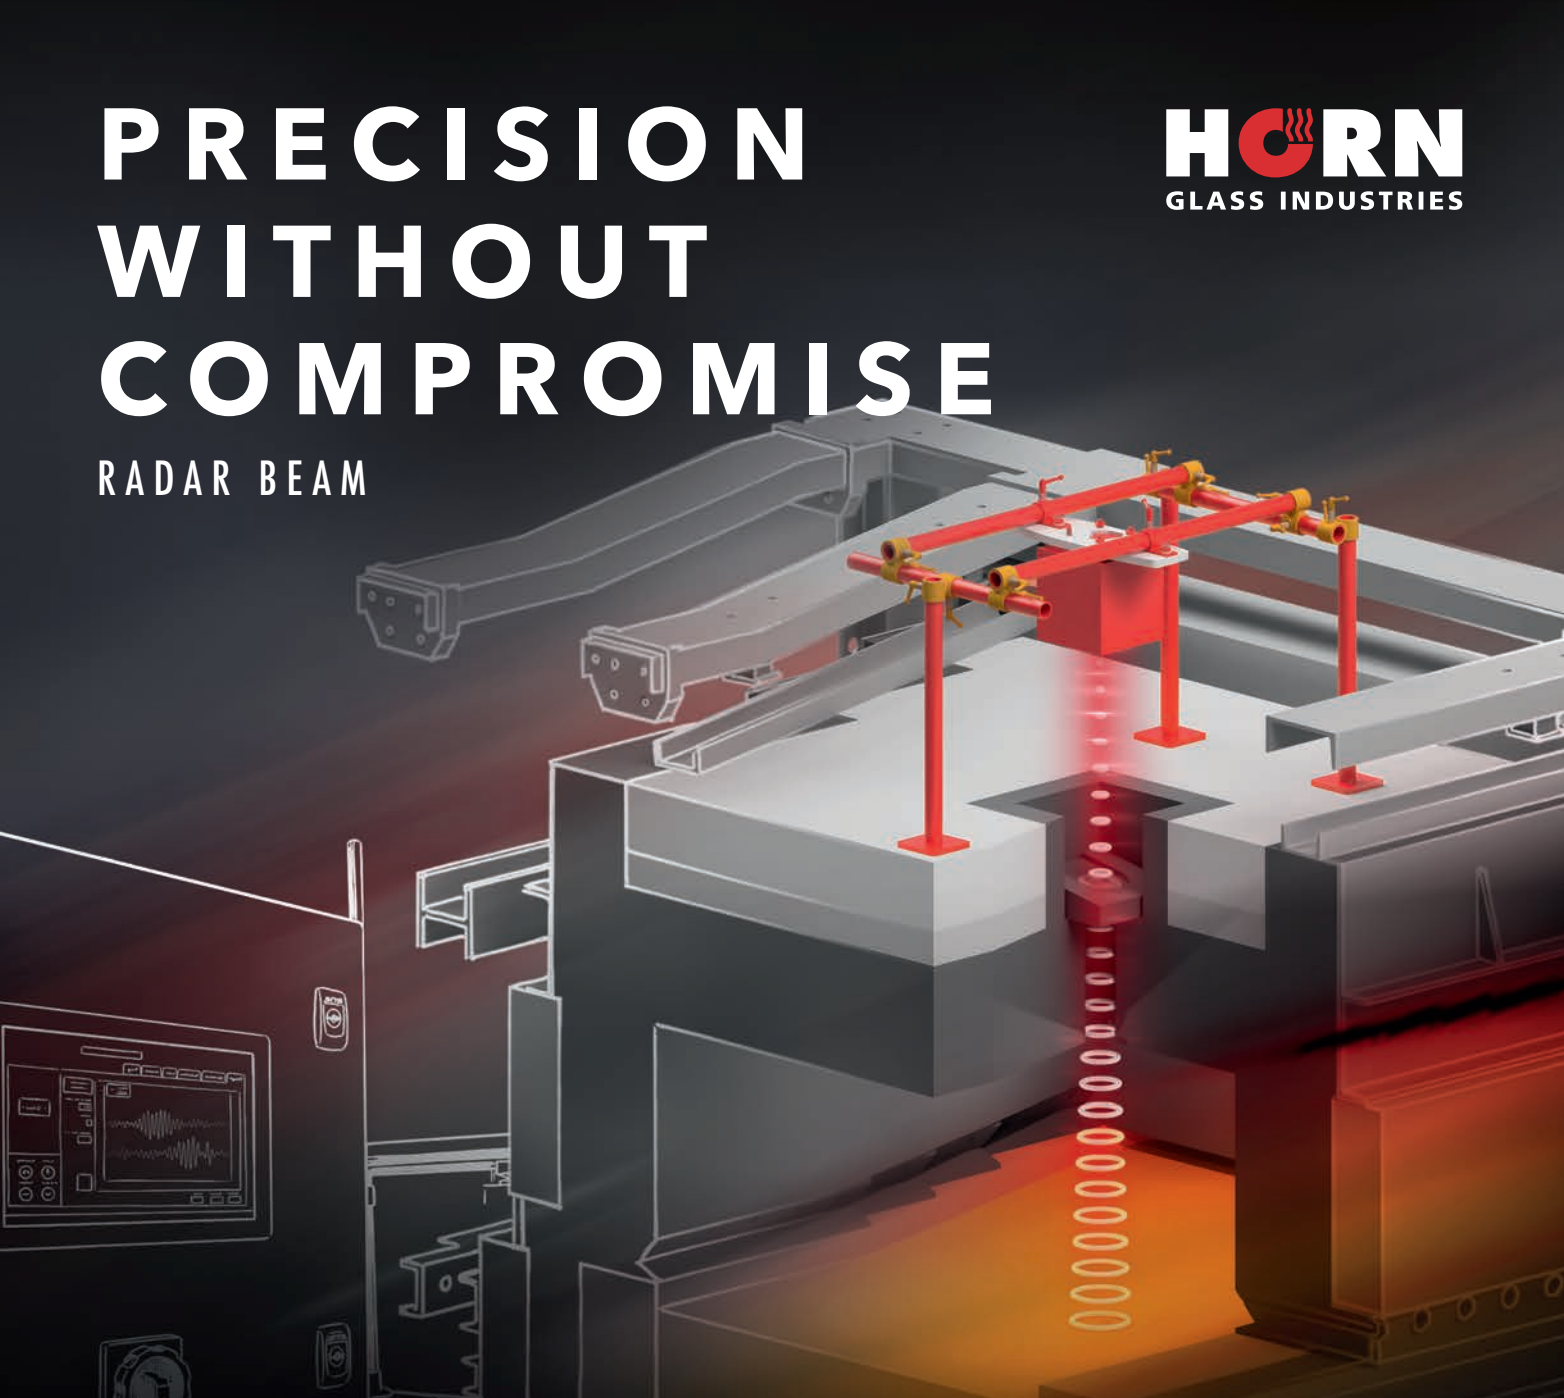
PRECISION WITHOUT COMPROMISE

HORN GLASS INDUSTRIES

RADAR BEAM



ACCURATE, ROBUST AND CONTACTLESS RADAR-BASED GLASS LEVEL MEASUREMENT FOR STABLE PRODUCTION PROCESSES.

High accuracy. Low maintenance. Contactless. Independent of glass colour. No moving mechanical parts. Wide range. Closed opening inside refractory superstructure. Easy installation and calibration. HORN Radar Beam system provides precise radar-based glass level measurement, even under harsh atmospheric conditions. A stable glass level ensures consistent gob weights and reduces refractory wear. Delivered as a stand-alone measuring system with the HORN evaluation unit and ready for seamless process integration.

EVOLUTION inspection machines, EVOLUTION NEO AI – intelligent inspection machines – iBot - AI-based assistant

PLANNED EXHIBITIONS 2026

Glasstec

Düsseldorf, Germany - 20/23 October

Product Range

- **SIDEWALL** • **SIDEWALL STRESS**
- **BASE** • **BASE STRESS** • **FINISH**
- **MOULD READERS** • **MULTI-ARTICLES**

In excess of six man-years of work by R&D engineers at **IRIS Inspection machines** led to the introduction of the Evolution NEO AI machine, delivering an innovative defect approach that relates to defect identification, as well as the creation of statistics by defect type. Local trend analyses are produced on the machine, with information presented in a user-friendly format. Importantly, reduced dependence on human intervention was a key goal for this strategic initiative, which brings the smart factory much closer to reality.

Advanced inspection intelligence

Evolution NEO AI is engineered to meet the distinct needs of the glass container inspection market, helping customers to improve performance and save valuable time during the manufacturing process. In particular, the introduction of advanced inspection intelligence is high on the list of benefits that have been widely valued by glass plant personnel in the first few months of machine operation.

NEO Intelligence is a machine learning-based software, incorporating the latest, well-proven technologies applied to inspection. Performance is enhanced via the power of artificial intelligence and already 'smart' features have been made even more accurate via the inclusion of an Image Processing Accelerator (IPA). As a result, Evolution NEO AI machines can now recognise and more accurately detect critical defects, without having to set advanced settings manually.

Reduced dependence on human skills

The introduction of greater automation has reduced the inspection equipment's dependence on human skills, another factor that has already been widely appreciated by customers. This AI-powered machine is able to recognise a defect, leaving the operator to decide whether it is acceptable or not. Furthermore, the specially conceived interface design is responsible for the delivery of a better user experience.

Traditionally, every time a production change is initiated, it has been necessary for the operator to adjust all parameters for the new article, set the inspection zones etc. With Evolution NEO AI, a library of settings is available for faster, precise and repeatable adjustments. The Evolution NEO AI machine recognises the article, its exact shape and automatically draws the inspection zone. Consequently, each job change is simplified for the operator. This reduces the possibility of human errors significantly.

IRIS complete range is named Evolution because the modular structure and Artificial Intelligence enabled features evolve through time and never become obsolete.

All existing IRIS machines can be upgraded with software and hardware innovations developed by in-house experts.

IRIS customers benefit from cutting-edge inspection technology during the whole lifetime of their Evolution machines.

EVOLUTION NEO AI range

Glasstec
Düsseldorf, Germany - 20 /23 October

Koenig & Bauer Kammann GmbH is the world's most innovative company for the manufacturing of container glass decorating machines. With more than 65 years of experience, Koenig&Bauer Kammann GmbH keeps bringing new ideas and innovations to the market, to enable all companies involved in container decoration to successfully and profitably decorate their products.

Articles:

- Beverage bottles (soft drinks, beer and spirits)
- Cosmetics (flacons)
- Drinkware (drinking glasses, tumblers etc.)

Article sizes and shapes:

- Diam. 20mm – 200mm
- Height 40mm – 470mm
- Round, oval, flat and irregular shapes
- Special solutions for other dimension upon request

Decorating Processes:

- Screen printing
- Digital printing
- Hot stamping
- Design for organic and/or ceramic ink systems available
- Pad printing
- Labelling

Additional processes:

- Flame pre-treatment inline/offline
- Silane pre-treatment inline/offline
- Anti static cleaning
- Print image inspection system
- Mobile Hot Stamping Unit
- Mobile Labelling Unit

Output and machine features

- 1,000/h – 36,000/h
- 1 – 12 printing stations
- Contactless pre- and main orientation
- Single capture tooling
- +/- 0,1 mm color to color registration
- fully CNC design

Sales and Service

- Subsidiaries in USA and China with machine showroom and training facility
- Sales agencies worldwide
- 24h service hotline
- Remote online support for all machines
- In-house training center in Germany
- Sampling on customers articles and quality testing in Germany
- 100% spare parts availability

Machine Series

- K15-series: universal, indexing table machine with min. 6 up to max. 30 tooling stations and integration of all processes
- HS-series: high speed screen printing machine for beverage bottles
- K20-series: universal, linear single/dual tool machine and integration of all processes
- K31 series: pretreatment line with flame/silan
- K4DP: Entry level digital printing

www.konatic.com

At **Konatic**, we design intelligent sensors and inspection systems for the hollow glass industry. Based in France, we support glass manufacturers throughout the entire production process with modular and reliable technologies, adapted to real-world industrial needs and designed to grow with evolving challenges.

We work with a network of local partners to ensure coverage in as many countries as possible, including Brazil, Mexico, the United States, Europe, South Africa, Egypt, Thailand, South Korea, and China.

At the hot end:

- Our **Smart Gob** measures gob weight and shape with precision, enabling closed loop regulation of the feeder to reduce variation and material waste.
- **Spyro** monitors *mold* temperature on every cycle using infrared cameras and adjusts ventilation in real time to stabilize forming conditions and improve overall efficiency.
- **Trinity**, our latest innovation, combines a unique High Dynamic Range (HDR) sensor with AI, installed at the hot end. It enables rapid detection of process variations and critical defects, ensuring greater reliability and quality control.

In the lab:

- We provide **InnerScan** to measure the internal profile of the bottle, which is particularly useful for wine bottles with corks.
- **Nano** measures coating thickness without index fluid, offering **nanometer** level accuracy confirmed by major players in the industry.
- **Fusion Machina,** which we distribute exclusively, automatically counts seeds and bubbles without the need for a microscope enabling monitoring and precise adjustment of furnace burner settings to reduce imperfections at the source.
- **Tin Reader** allows operators to instantly assess the tin oxide coating on hot bottles, improving consistency and reducing scrap.

- **Precision** is our dedicated microscope for **Datamatrix** code inspection, helping to identify poor engravings before they affect traceability.

For traceability:

- We offer **Hexagon, Spin Reader,** and **Helical Reader**, which decode engraved **Datamatrix** codes without contact, even in harsh or fast-paced environments.
- **Hexagon Alpha**, developed with a cosmetics manufacturer, reads arabic codes on the neck and enables automatic rejection of defective bottles and defects correlation.
- **Hexagon Décor**, to inspect decorated bottles with ACL printing.

For tubular glass:

- **Smart Vial**, our cutting-edge AI-powered vial inspection technology, for accurate dimensional control on pharmaceutical vials (tubular glass) and inspection of cosmetic defects (such as scratches, bubbles, black points,...), to be installed on production lines.

We also offer tailor-made solutions based on your specific needs.

OCMI GROUP is a world-leading company in the design and manufacturing of machinery for the production of tubular glassware for the pharmaceutical industry and hollow glass processing equipment.

With over 105 years of experience and more than 3,200 production lines installed worldwide, OCMI GROUP proudly stands as a symbol of Italian excellence and expertise in the glass machinery sector.

Backed by a team of more than 250 employees, four production facilities, and four sales offices across the globe, OCMI GROUP is a recognized leader in delivering best-in-class solutions for the manufacturing and processing of glass containers for both pharmaceutical and tableware applications.

Through the adoption of cutting-edge technologies and a continuous focus on innovation and improvement, OCMI GROUP ensures maximum quality, efficiency, precision, and reliability to meet the evolving needs of its customers worldwide.

KYP is specialized in ampoules lines, after market and belongs to OCMI GROUP since 2019.

COMPANY FOUNDED

1914

With decades of experience and almost 300 supplied batch plants, **Lahti Glass Technology** offers high-quality batch plant and recycling plant solutions for the glass industry. All solutions are made with green Nordic values, which means sustainability and work safety are built-in to the way of thinking and the offered solutions.

Lahti Glass Technology – LGT – is known for its advanced ability to engineer and understand the benefits of technology for a wide range of operations and provide customized solutions. Their core expertise lies in knowledge of raw materials handling in the demanding field of the glass industry.

Lahti Glass Technology is the only supplier in the glass industry that can utilize advanced fluidization technology for raw material conveying and can build the plant even without any motors – a sustainable, efficient and cost-saving method.

Lahti Glass Technology will constantly improve their solutions and create new components/equipment to face the challenges of the future as well. Solving challenges in partnership with clients has proven to be an effective way to develop solutions.

Challenges are made to be solved!

This is what you can expect:

- Operational excellence
- Long-term savings
- More profit
- Less energy consumption
- Effortless maintenance
- Increased capacity
- Optimized material use
- Assured quality
- Sustainable solutions
- Healthier work environment

About Us

Linco Baxo Industrie Refrattari S.p.A. is a leading Italian manufacturer of high-quality refractory and insulating products, founded in 1949. Our four integrated production plants in Italy ensure capacity, flexibility, quality, and competitive pricing, with total group output exceeding 80,000 tons annually and a team of over 150 employees.

Mission

We are committed to delivering state-of-the-art refractories and top-tier service through continuous innovation and improvement to meet growing global expectations in the glass industry.

Product Range

- Channel & Superstructure blocks for Working-ends and Forehearths
- Feeder Expandables
- Insulating Bricks & Shapes grade (ASTM 23,26,28,30,32, 33, 34)
- Refractory & Insulating Bottom blocks for furnace safety
- Alumina, Sillimanite, Zircon and Zircon-Mullite bricks and itemised shapes
- Special Blocks for hot-repairs
- Castables, ramming mixes, patches and mortars
- Ancillaries and auxiliaries

Why Linco Baxo

With over 70 years of industry experience, Linco Baxo stands for consistency, technical expertise, and long-term partnerships. Our vertically integrated production and hands-on approach allow us to respond quickly to client demands, ensuring reliability, safety, and performance in every project. Our plants are equipped with a central laboratory with full in-house testing capabilities.

Our refractories are used worldwide in the glass industry and beyond. Customers rely on us not only for quality materials, but also for guidance across design, selection, installation, and maintenance.

Engineering & Technical Services

Beyond manufacturing, Linco Baxo provides full technical support and engineering services. Our experienced team works closely with clients to:

- Develop tailored refractory solutions
- Adapt to evolving industry standards
- Implement maintenance and repair strategies
- Support hot repairs and emergency needs

Product Range

- **CHANNEL & SUPERSTRUCTURES BLOCKS FOR WORKING-ENDS AND FOREHEARTHS**
- **EXPENDABLES FOR FEEDER**
- **REFRACTORY & INSULATING BOTTOM BLOCKS FOR FURNACE SAFETY**
- **ALUMINA, SILLIMANITE, ZIRCON AND ZIRCON-MULLITE BRICKS AND ITEMIZED SHAPES**
- **CASTABLES, RAMMING MIXES, PATCHES AND MORTARS**

Luben Glass has been operating in the hollow glass industry since the 1980s and, through a continuous path of growth and development, has established itself as a trusted partner for the supply of spare parts, special equipment, custom-made inspection gauges for both moulds and spare parts, machinery, plants, chemicals, and technical and energy consulting services for glass manufacturers.

The company's mission is to support its customers with innovative, reliable, and performance-oriented solutions, addressing the needs of both the Hot End and Cold End production areas. With over four decades of experience and the expertise of its technical team, Luben Glass is able to provide not only standard products but also tailor-made solutions designed to meet specific operational requirements, ensuring the highest levels of quality, efficiency, and reliability.

In recent years, the company has undertaken a significant international expansion strategy, strengthening its presence across key global markets through strategic partnerships, local collaborations, and a network of qualified agents operating worldwide. Today, Luben Glass is actively present in strategic regions including Africa, France, the United Kingdom, the Americas, India, and Indonesia, providing direct support to customers and developing an in-depth understanding of the unique challenges and opportunities within each market.

A key driver of this growth has been the synergy with the OMCA Group, which has enabled Luben Glass to continuously expand its product portfolio and technological expertise. Through this collaboration, the company has enhanced its capabilities in industrial automation, process optimization, and the development of advanced machinery and systems, offering an increasingly comprehensive range of products and services to the glass industry.

Dynamism, technical expertise, innovation, and customer proximity are the core values that guide Luben Glass every day. By continuously investing in research, development, and international cooperation, the company remains committed to supporting the technological evolution of the glass industry and delivering reliable, high-value solutions to glass manufacturers worldwide.

COMPANY FOUNDED

1952

Marposs is a worldwide leader in precision equipment for measurement, inspection and testing in production environment.

Headquartered in Bentivoglio (Italy), it is present with its sales and service network in 34 countries. Production is based in Italy, as well as in other countries such as China, France, Germany, Japan, Korea, Mexico and the US.

Marposs has been operating in the glass industry for about 30 years, providing products and systems for dimensional and geometric measurement of glass packaging for food and beverage, pharmaceutical, cosmetic and perfumery sectors.

VisiQuick

Marposs' products for glass containers measurement, on sample basis, include:

- flexible automatic (**VISIQUICK, ATMOS, HYDRA**) and semi-automatic (**VISIQUICK-mini, IDSCAN**) systems for glass containers measurement and testing
- chromatic confocal sensors

VISIQUICK is a fully flexible and modular gauging machine, including one or more stations for measuring:

- external dimensions on body, neck and finish with cameras;
- weight;
- push-up;
- bore diameter and internal profile;
- wall-thickness;
- labelling area profile (sinks and bulges)

VISIQUICK is available both in standalone configuration, with single or multi conveying systems, or for integration in the production lines for sampling measurement.

VISIQUICK-mini is a camera-based, compact, semi-automatic gauging bench for external dimensions measurement.

It can be used in the Quality Control Laboratory or close to the manufacturing line, where it can profitably replace all go and no-go gauges for external dimensions control. It can also be equipped with an optional scale for weight measurement.

IDSCAN is a semi-automatic gauging bench for bore diameter and internal profile measurement, available in two versions for the cold-end (**IDSCAN CE**) and for the hot-end (**IDSCAN HE**).

ATMOS is a flexible machine for measuring brimful internal volume of glass containers, without using water. It is particularly suitable for perfumery and cosmetic containers.

HYDRA is a combined machine for burst test and/or brimful and fill-point internal volume measurement of glass containers. It can be installed downstream VisiQuick or in standalone configuration.

More information on Marposs solutions for glass packaging is available on the Marposs website:

COMPANY FOUNDED
1980

Messersi Packaging, one of the most important brands of Made in Italy related to packaging and industrial automation, operates in more than 60 countries, with an export share of over 70% sales and after-sales services in all continents.

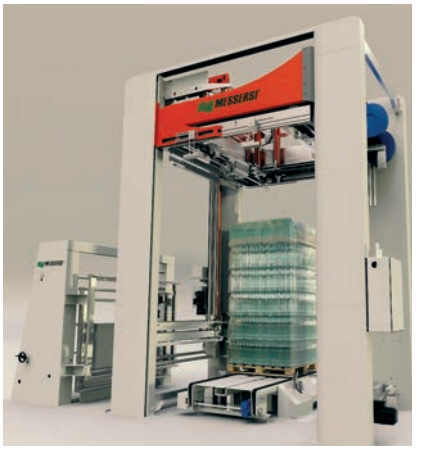
Messersì Packaging designs and manufactures industrial automation systems with machines and lines for each end of line, of any industrial and logistics sector, for any merchandise and packaging, anywhere in the world. Pursuant to a mix of knowledge and skills that cross advanced mechanics with interdisciplinary content ranging from robotics to mechatronics, from electronic to hydraulics, from electrotechnics to thermodynamics. The production of strapping band, machines and packaging lines is **totally made in Italy**, in the Marche Region - at the center of a historic district of the mechanics and automation linked to packaging developing from Via Emilia to the Adriatic coast.

Shrink Wrapping Machine SH77

Shrink Wrapping Machine SH77

The machine combines and synchronizes three different and independent phases: preparation of the tubular film, hooding and heat shrinking, merging them together in a single process minimizing the downtime of various devices, providing exceptional levels of productivity (up to 140 packages per hour). The system for gripping and handling the tubular film is independent from the heat shrinking system ensuring maximum reliability in terms of wear resistance of the components and wires.

Shrink Wrapping Machine SH45



Shrink Wrapping Machine SH45

The SH45 automatic shrink wrapping machine is a combined machine which, using a single work station, performs the hooding and heat-shrinking operations of the product to be packaged. The SH45 automatic machine uses a reel of shrink film in tubular form equipped with side bellows. In the different versions, up to three film reels can be reached. The film is heat-shrunk on the product by means of a gas-fired ring oven; all functions are controlled by a PLC that manages the automatic and manual operations.

Strapping machines

The automatic strapping machines, horizontal, vertical, lateral and with compression are designed to pack all kinds of material easily and quickly. User-friendly and customizable, they are employed in numerous industrial and craft sectors.

Strapping machines

Packaging Lines

The Packaging Lines are conceived and designed for the leading manufacturers in the glass sector. They represent the most innovative part of automation systems, the more structured one in terms of functions, machines models and service equipment, the most specialized one; each packaging line reveals production and logistics policy choices, work strategies and inventory management. The complexity of the solutions, the size and location of the plants are a special heritage of experience and expertise, specialized know-how prefiguring new and infinite solutions.

- **RAW MATERIALS**

Minerali Industriali Srl is an independent Italian mid-sized mining company that produces raw materials for the glass and ceramic sectors, along with sport&leisure and specialties.

Minerali Industriali's global presence counts 16 extraction and production units in Italy, 2 in Europe, 1 in North Africa, 7 in Central and South America and 1 in Asia.

The following 9 companies produce raw materials for the glass industries:

- MAFFEI SARDA SILICATI S.p.A. (Italy) feldspatic sands for container glass (flint);
- MINERALI INDUSTRIALI S.r.l. (Italy) silica sands for containers, tableware, technical and float glass;
- SASIL S.r.l. (Italy) low iron quartz, silica and feldspatic sand, feldspar, cullet (glassy sand) for containers, tableware, technical and float glass;
- SUEZ COMPANY FOR MINERALS SA (Egypt) - micronized quarts for fiber glass and feldspar for float and container glass;
- LOCHALINE QUARTZ SAND Ltd. (Scotland) - sand for float, solar, containers, tableware and technical glass;
- COLOMBIA MINERALES INDUSTRIALES SAS (Colombia) sand for float and containers glass; tableware and technical glass;
- CZECH SILICAT Sro (Czech Republic) feldspar for float, containers, tableware and technical glass;

- GRUPPO MINERALI DO BRASIL Ltda (Brazil) feldspar for float, containers, tableware and technical glass;
- MEXICAN SILICATES Sa de CV (Mexico) feldspar for float, containers, tableware and technical glass

Minerali Industriali products satisfy all the most demanding sectors of flint glass: food and perfumery containers, articles for tableware and lighting, artistic, architectural glass, automotive glass, technical and solar glass. Constant product quality is assured by a strict process control system and by systematic chemical and granulometric analysis.

Minerali Industriali staff can give all necessary information about the company's products and provide technical assistance. Minerali Industriali can also advise clients on the most affordable solutions.

Product Range

- **AMPOULE FORMING MACHINES**
- **AMPOULE/VIALS AFTER-FORMING LINES**
- **CAMERA VISION SYSTEMS**

Moderne Mecanique, a company of OCMI-OTG S.p.A, is a worldwide leading manufacturer of ampoule forming machines and ampoule/vial after-forming lines.

The present production range includes:

- **MM30 Ampoule Forming Machines:** The most popular ampoule forming machine with more than 1,500 installations worldwide. Its sturdy construction assures the longest working life. This machine can be equipped with automatic tube loader for continuous tube loading without operator support.

The machine can be integrated with:

- **OPTISTEM/2**, an automatic stem vision device checking the forming operation by self-adjusting the oxygen flow in the last two heating burners before the forming section. The new OPTISTEM/2 system provides full dimensional control IN REAL TIME of the ampoules in order to realize 100% quality control during the forming process.

- **LA502 Ampoule Afterforming Lines**, which handle all glass container finishing operations, such as electro-mechanical dimensional control, application of colour rings for ampoule breaking or identification, printing and predrying, annealing, sorting and packing.

These lines can be integrated with:

- The new **Gas Powered Hood** for annealing lehr which can replace the standard electric one.
- **OPTICUT**, an electronic or mechanical device to apply the easiest and safest way of opening ampoules, using a predetermined breaking point;
- **Closing device** for the production of ISO form "D" ampoules;
- Extra **colour rings** application devices.
- **Automatic ampoule packing machines** developed by OCMI or Kyp

- **LF520 and LF535 VIAL AFTERFORMING LINES** are able to perform important operations such as electro-mechanical dimensional control, printing and pre-drying, annealing, sorting and packing: the new version of annealing lehr with alternative conveying system allows to reduce the minimum total lenght of vials to be processed. The lines are able to match the high speed vial machines produced by OCMI-OTG S.p.A. such as **FLA20/S** and **FLA35**.
Automatic packing machines developed by OCMI are suitable to be connected with **LF520** or **LF535** after-forming lines.

OCMI GROUP is a world-leading company in the design and manufacturing of machinery for the production of tubular glassware for the pharmaceutical industry and hollow glass processing equipment.

With over 105 years of experience and more than 3,200 production lines installed worldwide, OCMI GROUP proudly stands as a symbol of Italian excellence and expertise in the glass machinery sector.

Backed by a team of more than 250 employees, four production facilities, and four sales offices across the globe, OCMI GROUP is a recognized leader in delivering best-in-class solutions for the manufacturing and processing of glass containers for both pharmaceutical and tableware applications.

Through the adoption of cutting-edge technologies and a continuous focus on innovation and improvement, OCMI GROUP ensures maximum quality, efficiency, precision, and reliability to meet the evolving needs of its customers worldwide.

MODERNE MECANIQUE is specialized in ampoules lines and belongs to OCMI GROUP since 1997.

MSK Covertech Group - Your Cold End partner

50 years of experience at the **cold end** have made **MSK** one of the leading equipment suppliers from lehrs to warehouses with **different levels of automation**. Customers appreciate MSK engineering, software and automation competence, as well as the unique and innovative MSK systems.

The modular construction of **MSK bottle conveying technology** guarantees a high degree of flexibility and fully automatic flow of bottle transport.

MSK robots and palletizing systems offer solutions whatever performance and flexibility is required. The latest generation can automatically be adjusted to alternating bottle types and offers quick-change mechanisms and easy accessibility for fastest possible job changes.

MSK shrink-wrapping solutions rank among the most sold machines in the glass industry: user-friendliness, availability and safety are the distinguishing MSK characteristics, as well as efficiency and sustainability. MSK wrapping systems are able to process films made of recycled material. Energy consumption is reduced about 13% with the latest shrink frame development.

MSK EMSY HMI controls the complete cold end. Networked communications and adopted parameters ensure dynamic line management and easy operation without interface problems. As developments and enhancements are carried out 100% in-house, MSK adapts the system to individual needs and is independent from third parties.

The **EMSY smart app** allows for mobile status monitoring of MSK systems via smart phone. Maintenance, repair and spare parts supply is supported by the digital **EMSY service** pad. **EMSY analytics** enables smart and superordinated controlling of the overall equipment.

With subsidiaries and representations, MSK is located close to its customers, also with fast and economic help thanks to its 24-hour emergency and online service.

- **OPTICAL INSTRUMENTS FOR AUTOMATIC MEASUREMENTS AND QUALITY INSPECTION IN LAB AND IN GLASS PRODUCTION LINES.**

NIROX is an **Italian company** specialized in optical **measuring** and **quality control instruments** and systems for **industrial productions**.

Glass is our main market, and our sensors and systems are mostly used in **Pharmaceutical, Electronic, Scientific** and **Automotive Glass**.

Our portfolio of solutions is continuously increasing and expanding to other market segments, as we face every day new challenges from our valuable customers.

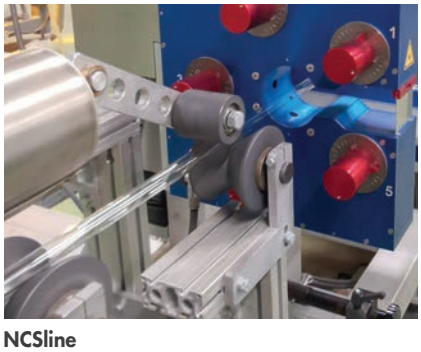
Our sensors for glass are:

- **ODk** sensors are optical micrometers which allow measuring **outer diameter and ovality**. Different measuring ranges are available for different market segments.
- **m-Thick** measure **thickness of glass** panels, tubes, and objects in general. In the automotive glass market, they are used to measure **thickness of PVB** in the stretching lines.

- **multi-Thick** analyze **complex structures** by measuring the **thickness of each layer**, including **coating**. They are used in **automotive glass** to measure inner layers after lamination.
- **OTS optical sensor** is used in the **glass chemical etching process** for electronic displays. It measures the thickness of the panel during the process, in the slimming chamber.

Our systems for glass are:

- **NCSline** is a family of systems for dimensional inspection of pharmaceutical **glass tubes in production** lines. Tube tracking for sorting and cosmetic inspection data integration provide the total control and performance analysis of the production line.
- **NCSlab** is an automatic **offline measuring instrument** for glass **tubes and preforms** which quickly provides tubes measurements for **production control or incoming inspections.**



NCSline

- **VISline** is a family of devices designed for the **pharmaceutical primary packaging**, to be installed on the **glass tube converting machines**. The main controls are:
  - **VISline.B**: bottom features
  - **VISline.D**: dimensional measurements on the forming machine and on the after-forming line
  - **VISline.C:** cosmetic inspections after the annealing oven
- **EVline** inspect **pharmaceutical glass tubes after the cutting and glazing** machine. **Dimensions and defects** are both inspected by state-of-the-art image processing algorithms.

- **CMSline** systems provide the inline cross-sectional measurements of **glass capillaries in the drawing process.** All dimensions are obtained with just one sensor with multiple heads expansions.

EQUIPMENT FOR THE PRODUCTION OF GLASS TUBULAR CONTAINERS FOR PHARMACEUTICAL AND COSMETIC USE:

- **FA36S** ampoule forming machine. This 36-station machine is equipped with a special section to shape the first bottom of each new glass tube in order to minimize glass wastage. It can be integrated with **OPTISTEM/2** camera control system working with self-adjustment of oxygen level.
- **FLA20/S-FLA35**: 20 or 35 stations forming machine working with continuous rotation to produce all ISO DIN vials including penicillin, insulin, screw-neck and blow-back types. Equipped with servo-driven main forming stations, they can be equipped with hot-end camera control system OPTIVIAL.
- **FLA18**: new 18/9 stations forming machine working with index rotation to produce all ISO DIN vials. Index rotation driven by water-cooled torque motor. Tools of forming stations driven by servo-motors. Inspection system OPTIVIAL available for vials dimensional control.
- **LF518**: after-forming line to be connected with FLA18 vial forming machine, equipped with cooling fans, electro-mechanical control for total length, camera inspection system for inner mouth diameter, electrical annealing lehr with pick&place loader and unloader, packing section with option of automatic packing available.
- **FLA 20-DROPPER:** is a 20-station continuous rotary machine able to produce droppers with different shapes of tips and flanges through special tube cutting and forming devices. Suitable for the installation of camera control systems OPTIVIAL.
- **FLA20-CAR** is a 20-station continuous rotary machine able to produce all types of dental cartridges thanks to the crack-off station for bottom cutting through thermal shock. Suitable for the installation of camera control systems OPTIVIAL.
- **ROBOGLASS**: Automatic glass tube feeder suitable to be connected with all forming machines supplied by OCMI-OTG S.p.A. and controlled companies.
- **ATL4:** Automatic tube loader with handling system for the preparation of complete bundles in pre-loading position. Available to be connected to OCMI vial forming machines with index rotation.
- **PM-A/PM-V.** automatic ampoules/vials packing machine ready to be connected with after-forming lines made by Moderne Mecanique and Kyp. The vacuum picking device enables perfect gripping of the containers. The operator can be sure to insert the same number of ampoules/vials in each box without missing products.
  Furthermore, the problem of friction between containers during traditional manual packing is solved.
  The number of ampoules per box, the number of ampoule rows per box and the number of ampoules per each row can be set by means of a user-friendly touch screen.

AUTOMATIC MACHINES FOR STEMWARE PRODUCTION:

- The **SA42, SA48** and the **SA60** sealing machines for stemware are the answer to every market-oriented tableware factory. They allow for a matching of the highest efficiency and production speed with a flexibility never before achieved by alternative systems. Equipped with a complete range of intelligent control systems able to control and maintain the final quality of products.
  SA sealing machines are equipped with loaders for bowls and stems and unloaders for finished products according to **OCMI** drawings. OCMI's sealing machines include a section for stem stretching if required, as as per article type under production.
- All OCMI stemware machines can be equipped with Vision Systems that allow 100% consistent control of chucks adjustment and surface defectiveness.

OCMI GROUP is a world-leading company in the design and manufacturing of machinery for the production of tubular glassware for the pharmaceutical industry and hollow glass processing equipment.

With over 100 years of experience and more than 3,000 production lines installed worldwide, OCMI GROUP proudly stands as a symbol of Italian excellence and expertise in the glass machinery sector.

Backed by a team of more than 250 employees, four production facilities, and four sales offices across the globe, OCMI GROUP is a recognized leader in delivering best-in-class solutions for the manufacturing and processing of glass containers for both pharmaceutical and tableware applications.

Through the adoption of cutting-edge technologies and a continuous focus on innovation and improvement, OCMI GROUP ensures maximum quality, efficiency, precision, and reliability to meet the evolving needs of its customers worldwide.

Technology, passion and tradition – the perfect blend to make every mould the ideal solution.

OFFICINE SL has been designing and manufacturing high-precision moulds and tooling for the glass industry since 1948. Today, the company is led by the third generation of the founding family, ensuring continuity of technical expertise, manufacturing know-how and a long-term commitment to quality, innovation and customer satisfaction.

The company is specialized in the design and manufacture of:

- moulds for blown glass production with IS machines, O90 and H28 machines, B&B and semi-automatic machines for bottles, jars, blown glasses, stemware, tumblers, etc.;
- moulds for pressed-glass production of glasses, tableware, vases, goblets, stems, etc.;
- moulds for technical glassware production, including glass bricks, power insulators, lighting products, lenses, borosilicate pots and washing-machine windows;
- moulds for spinning machines used to produce dishes, cups, underplates and centrepieces.

OFFICINE SL places particular attention on the careful selection of materials. Depending on the specific application, production conditions and performance requirements, mould components are manufactured from cast iron, steel, bronze or stainless steel.

The company's mission is to provide customers with consistently high standards of product quality, technical support and service. Drawing on decades of industry experience, OFFICINE SL works in close partnership with its customers to address specific production requirements, optimize manufacturing processes and identify the most effective technical solutions with reliability, efficiency and professionalism.

In 1996, the company implemented a Quality Management System in compliance with the UNI EN ISO 9001 standard, with the objective of systematically managing and continuously improving all business and production processes. This customer-focused approach is designed to enhance product reliability, operational efficiency and customer profitability.

Thanks to the experience and technical expertise of its team, OFFICINE SL supports customers at every stage of the project, from the feasibility assessment of the article to the design and construction of the production equipment required for its manufacture.

Since 1946, with the first rotary blowing machine up to the acknowledgement of one of the major realities in the world of glass.

A way sprinkled with international performances and success stories, also through the acquisition of different brands such as ANTAS, LYNCH SYSTEMS and LINDNER, all led **Olivotto Glass Technologies** to be a global reference for the production of hollow glass.

We have built our technology-driven identity on continuous research for innovation, choosing to diversify and deepen our potentialities, thanks to investments in ever-increasing R&D.

For nearly 80 years, we have been – as we still remain – a leader in design, realization and implementation of complete plants for the production of hollow glass-providing highly customized solutions for all kinds of needs.

Highly skilled motivated engineers and technical teams that represent OGT, the recognition of the market and our peculiar and constant propensity to innovate, afford us the opportunity to be competitive in all sectors.

To anticipate the expectations of Customers and Markets, OGT organizes its activities through four Business Units:

- HOLLOW GLASS
- PHARMACEUTICAL PACKAGING
- INSULATION ENGENEERING
- FLAT GLASS ENGENEERING

Each BU is structured as a team of highly qualified professionals and engineers.

The supply of plants and integrated lines is completed by the production of tools, accessories and spare parts as well as by our well-known dedicated Service.

Our installations are present all over the world and we are able to guarantee assistance anytime, anywhere.

We exist in the glass market to expand the technological horizon beyond, so that this is more sustainable for the market and the environment, with the strength of exclusive and performing solutions, always.

OMCO International places its partners and customers at the center of its mission and strategy. By understanding industry needs and building strong collaboration, the company creates lasting synergies that drive mutual success.

With manufacturing and repair facilities across Croatia, Romania, Turkey, South Africa, India, and the UK, supported by foundries in Belgium and Slovenia, OMCO delivers a full range of solutions for glass container production. Advanced technologies, continuous R&D, and expert craftsmanship ensure moulds of the highest precision, durability, and performance.

Through fully integrated in-house production, OMCO guarantees strict quality control and extended mould lifetime. A strong focus on circular economy principles, high-quality repair services, and material recycling supports cost efficiency while maintaining premium standards.

High levels of automation, robotics, and integrated measurement systems ensure consistent quality and long-term reliability.

OMCO continuously invests in innovation, sustainability, and proximity to customers, while providing strong engineering expertise and design support, enabling fast response, flexibility, and strong partnerships. Together with its customers, the company develops forward-looking solutions such as lightweight designs that combine cost efficiency with extended product lifetime.

With a global workforce of over 1,500 employees and more than 600 CNC machines, OMCO provides reliable, practical solutions that deliver a clear competitive advantage.

- **STRAPPING HEADS**
- **STRAPPING MACHINES**
- **HOODING MACHINES**
- **WRAPPING MACHINES**
- **THERMOSHRINKING MACHINES**

As global leader, **OMS Group** specializes the design and production of **end-of-line packaging solutions** and complete packaging lines.

Established in Italy, OMS Group currently operates **12 branches worldwide** and provides **cutting-edge technologies** for every stage of the end-of-line process.

Relying on its **history** and **Italian craftmanship excellence**, the Group stands out for its **wide range of custom solutions.** Thanks to **vertical integration** and **in-house production of all spare parts**, OMS Group can adapt to each specific sector while maintaining **high quality standards** and **reducing the $C0^2$ emissions** during all the logistics operations.

OMS Group also provides technologies compatible with ever-evolving consumable materials, anticipating, and promoting new solutions that meet the highest green standards.

Thanks to a **worldwide team of technicians** and a **wide availability of spare parts** OMS Group can f**ollow and support its customers**, considering them as actual partners of the Group.

Following you can find a selection of the **OMS Group leading machines dedicated to the glass industry**.

The **AT55 thermoshrinking hooding machine** is an **automatic machine** which, on a **single workstation, applies and shrinks the hood on the pallet of bottles**. Depending on the chosen model, it can use up to three different coils of shrinkable tubular film with side gussets. The film is shrunk onto the product by a flameless ring gas machine.

The **PM-GLS vertical strapping machine + press**, for **palletized products**, has a top press capacity up to 2,400 Kg. Thanks to the **perfect combination between strapping heads, swords and the turntable** placed under the machine, it can apply multiple strapping patterns in both directions (from 2x0 up to 4x6).

The **06CL horizontal strapping machine** features an arch driven on a linear rack that guarantees a **perfect positioning of the straps** on the pallets, a **simplified head maintenance** with quick-action connectors and **different strapping programs** that can be **easily managed** from the operator panel.

The **AVR1000 wrapping machine** has been developed with a **carbon fiber ring, slip ring contacts** and a **patented pre-stretch carriage** up to 300% ratio. Possibility to start and stop the wrapping cycle at any height of the pallet load (Top or Bottom). **High speed, simplicity** and **flexibility**. The results are a **largely increased reliability** and **reduced maintenance** as well as stable loads with **minimal film consumption**.

Recently introduced in the market, the **FT55e electric thermoshrinking machine** is a typical example of o**ur commitment for a better environment**. This machine achieves the **same performance** of a **gas shrinking ring purely by means of electricity**. The **heaters are activated on demand**, only when the pallet to be shrinked is present. Thanks to the technology developed by the OMS R&D, **the power consumption has been drastically reduce**d.

PLANNED EXHIBITIONS 2026

Glasstec

Düsseldorf, Germany - 20/23 October

OMSO Spa, based in Reggio Emilia, is one of Italy's leading manufacturers of screen printing machines for printing on glass. Founded in 1952, the company has built a solid reputation in the industry through constant technological innovation and meticulous attention to quality.

Very soon, OMSO realised the potential of the glass market and began developing specialised machinery for screen printing on bottles containers for the cosmetics and perfumery industries. This proved to be a winning choice: the precision and reliability of its machines won customers all over the world, allowing the company to expand its range of products and services.

A key element in the success of its machines has been its ability to combine tradition and innovation by constantly investing in R&D. This has led to the creation of state-of-the-art machines capable of responding to the needs of an ever-changing market.

Today, OMSO Spa is synonymous with excellence in screen printing on glass. Its machines, designed and built in Italy, are recognised for their reliability, precision and ease of use. The company offers complete solutions, ranging from design to installation and after-sales service, guaranteeing its customers all-round support.

Servobottle

The Servobottle machine for screen printing on glass represents a technological advance in the industry, designed to offer precision, efficiency and versatility. Equipped with servo-driven motors, it guarantees precise and controlled movements, improving print quality and reducing changeover times. The platform turntable is equipped with 12 object-holding stations, adaptable to various diameters and heights. The automatic positioning system ensures precise colour registration (up to 10 colours), minimising waste. Designed for high-speed operations, the Servobottle facilitates fast changeovers thanks to tooless operations and an intuitive HMI interface. The control system constantly monitors print quality. In addition, the use of LED lamps for ink drying enables significant energy savings and a drastic reduction of polluting gases such as ozone and CO2. Compatible with ceramic glass inks, it is equipped with safety systems and designed for easy maintenance.

SB021.25

The SB021 screen printing machine for printing on glass represents a state-of-the-art solution, combining precision and efficiency with a sustainable approach. Equipped with servo-driven motors, it ensures controlled movements and superior print quality for up to three-colour decoration. The platform turntable is equipped with 10 object-holding stations, adaptable to various shapes and sizes. The SB021.25 is designed for fast changeover operations, with few tooless elements to change and a simple and intuitive HMI interface. One of the main features that makes the SB021.25 machine sustainable is the use of LED lamps for ink drying, which significantly reduces energy consumption and eliminates the production of polluting gases such as ozone. Maintenance and operational safety are ensured by advanced protection systems within a modern and attractive casing.

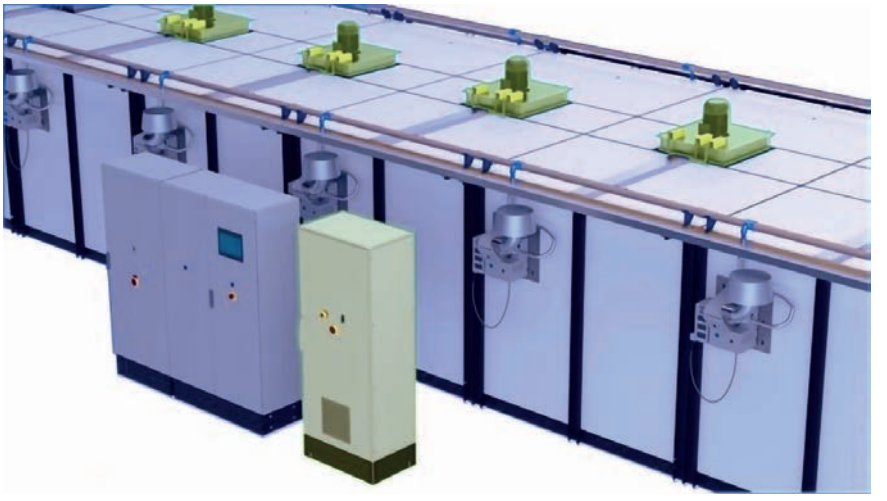
- **ANNEALING/DECORATING AND TEMPERING LEHRS**
- **FLOAT AND SOLAR GLASS LEHRS**
- **HOT-END HANDLING**
- **COLD-END COATING SYSTEMS**

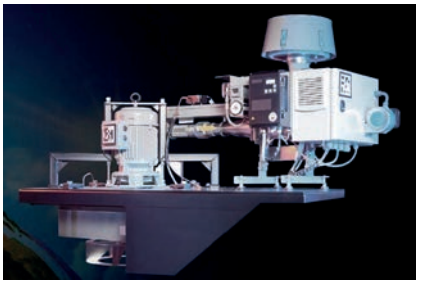
Pennekamp is a leading manufacturer of Annealing, Decorating & Tempering Lehrs, with an excellent reputation and more than 2.500 Lehrs being built since 1945. We continuously aim to assist the worldwide glass industry in Container, Tableware, Solar, Float and Automotive Glass sectors with reliable, economical and energy efficient equipment on a high technical level.

For the first time in the history of Glass Industry, Pennekamp is offering **Full HYBRID** Lehrs (gas & electric heating in one lehr). These Hybrid lehrs are being controlled by PLC via sophisticated Software to guarantee the highest energy efficiency.



Thanks to our newly developed **Electric Heating** System (**ConveX E**) that allows us to install them on the lehr's roof (as shown in above picture), while keeping the side burners operatable at the Lehr's side-wall.

Pennekamp's intelligent **BLEU Burner system (ConveX G)** will considerably reduce lehrs' energy consumption and harmful emissions such as NOX, CO & CO2, while it optimizes the combustion process at the same time. This intelligent system improves the heat distribution around glass articles during their treatment processing as well.



Intelligent Energy Saving BLEU BURNER

Pennekamp various types of Ware Transfer, Cross Conveyor and Multi Axis Stackers are other reliable components, which can work maintenance-free in the continuous production lines, increasing the performance.

Cold End Coating System & Cooling Fan Racks

Our preheating Mould Ovens and Firing Kilns bring reliability in to the cli-ents' production, and our Automation techniques at the Cold End area provide our clients by the highest productivity, where the articles are supposed to be coated.

Product Range

- **MOULDS & ACCESSORIES**

M-Modern technology - More than 90 fully automated CNC Machines, including 4 plasma (PTA), and 1 laser welding. Dedicated production lines to Bronze and to cast iron. Significantly increased production of accessories as funnels, bowheads etc., and doubled production capacity of Neckrings and guiderings.

O-Organization - Giancarlo Perego spa, with a view to continuous quality improvement, has for years embraced a more managerial oriented organizational model.

U-UNI EN ISO 9001:2018 certification - obtained in July 1995 and renewed in 2024.
This quality certification has clearly enabled us to improve our products by rationalizing production procedures, and thanks to last review we focused our attention on risk management procedure too.

L-Layout design - Our technical department is equipped with ultramodern software and can provide technical support for mold designing. Our staff regularly attend training courses on the various technologies used by glassworks today.

D-Delivery - Thanks to huge new investments we are now more flexible and faster in terms of delivery dates. Today we can also manufacture **FAST TRACK** trials in 2 weeks time.

S-Service - Giancarlo Perego Spa's post-sales services are always at clients' disposal along with the on-line direct LINE +39 02.

Giancarlo Perego Group has been manufacturing moulds for the glass industry since 1964. With 60 years of experience, and with continuous huge investments in new machinery and technology, the company is continuously consolidating its leading position in the global mould market every day. With its mould shop in Croatia, acquired in 2001 and completely renovated in 2012, Giancarlo Perego Group has a total covered area of 12,000 square meters. All these investments enable the Giancarlo Perego Group to significantly increase its production capacity; with more than 4,000 cavities per month, the company is able to supply tools all around the world, exporting the 80% of production to South America, USA, Europe, North, Center and South Africa, developing day by day strong business relations with major international partners.

Well aware of the difficulty of communicating the full scope of our activity in a few lines, Giancarlo Perego Group invites you all to visit our plants of Italy and Croatia.

Taschkent, Uzbekistan – 01/03 December 2026

Glassman Asia

Bangkok, Thailand - 17/18 March 2027

Glassman Europe

Istanbul, Turkey - 9/10 June 2027

Manufacturing more than 45,000 units since 1923, **Pneumofore** has long established its reputation as one of the first and most experienced **producers of high-capacity** rotary vane compressors and vacuum pumps. Today, industrial plants worldwide benefit from the reliability and durability of Pneumofore systems in a great variety of applications, including the moulding of hollow glass. The supply of compressed air and vacuum on IS machines improves the forming process, especially for complicated shapes of containers. Vacuum is also used on the blank side to increase the production speed and quality by reducing settle blow marks. For these reasons, the UV Series vacuum pumps and the A Series compressors are found in glassworks in more than 80 countries. Pneumofore systems are ready-to-use with dedicated accessories for every specific glass application and for round-the-clock operations, also under extreme and harsh climatic circumstances (tropical or polar), using exclusive **air-cooling** to **reduce operational costs**.

Pneumofore simply offers the solution for the **lowest Life Cycle Cost** with **up to ten years warranty** on efficiency and functionality of the Air-End. Pneumofore divisions cover a wide range of industrial needs and applications: **Vacuum, Compressed Air, Gas Compression, Engineering and Service.**

UV100 VS220 Vacuum Pump for Hot Climate

ROTARY VANE COMPRESSORS

Pneumofore Rotary Vane, lubricated, single-stage compressors range in power from 5.5 to 500 kW, with capacity up to 4,180 m^3/h. Each model has three different motor sizes for pressure ranges from 2.5 to 10 bar. Designed to run 24/7. Air-cooling as standard. Hot Climate, Variable Speed, Heat Recovery versions available.

ROTARY VANE VACUUM PUMPS

The UV Series are single stage, lubricated vacuum pumps ranging from 238 to 6,610 m^3/h, with 0.5 mbar residual pressure. In their Variable Speed version, they allow constant adaptation of the electrical motor's rotation speed in rpm in order to keep the same vacuum level all year through, independently **of bottle's size, shape or weight.**

CUSTOMER SATISFACTION

Pneumofore assists customers at every step: from process specifications throughout layout and installation, from commissioning to operation and long-term maintenance needs. Pneumofore **engineers and qualified technicians** provide support to all clients in order to ensure the choice of the right product and the best solution. Pneumofore also offers a complete **after-market service** for maintenance, spares delivery, on- or off-site support.

A520.4 VS400 Air Compressor with Variable Speed Drive

MAIN FEATURES

- Complete turn-key solutions for compressed air and vacuum supply
- Easy to install - compact footprint, no foundation required
- Air-cooled as standard
- Variable Speed, Hot Climate, Heat Recovery versions available
- No Air-End overhauling, non-consumable parts, constant performance
- High energy savings and low cost of maintenance.

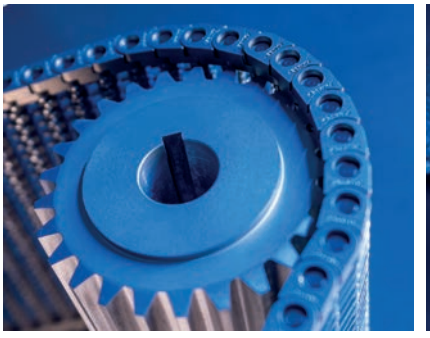
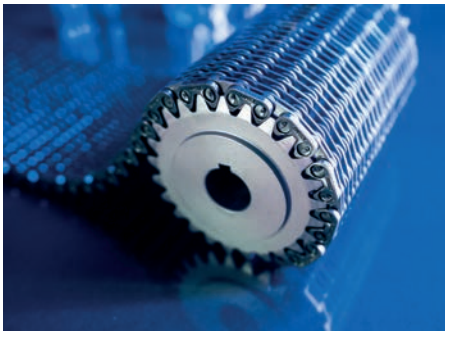
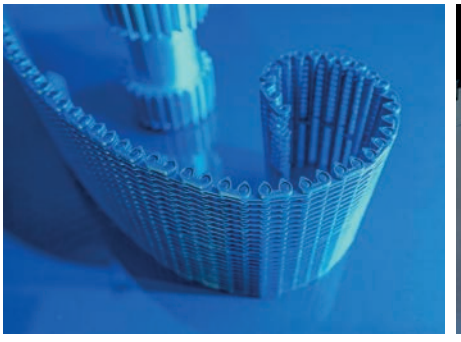
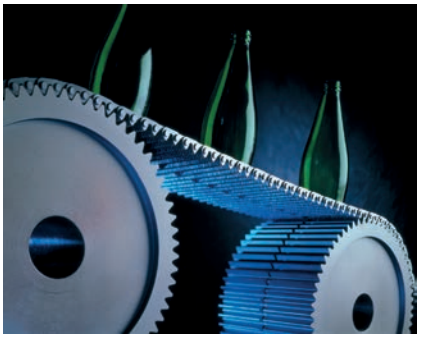
- **FORMING/HOT END: MACHINERY AND EQUIPMENT: CONVEYOR CHAINS FOR BOTTLE TRANSPORT; ALLGUARD FX, LIFEGUARD, ALL-STEEL, SENTRY 2-PIN, ULTRALIFE**
- **SPROCKETS**
- **RAMSEY KNOCK OUT TOOL (RKO)**
- **TAKE OUT ARMS**









Ramsey Silent Chain

Founded in 1923, Ramsey Products designs and manufactures industrial silent chain products for power transmission and conveying applications. Ramsey offers the world's widest range of top-quality products designed for both hot end and cold end bottle handling. We deliver the highest level of quality, excellent customer service, and competitive prices. Our conveyor chains can run at extreme speeds while providing smooth bottle transfer and exceptional chain life.

Our Most Popular Conveying Chain Products

Standard and Extended Pitch Conveyor Chains, Ultralife®, R-SelectTM, Wear Protected Chains – Allguard FXTM, Lifeguard®, Sentry®, Ramsey All-SteelTM and Stainless Steel, and our RKO Knock Out Tool® and Take Out Arms. Not only do we offer a full range of chains and sprockets, we also custom design and manufacture chains to meet your exact requirements.

Over the past 100 years, Ramsey Products has grown to become a dominant force in the chain industry, offering thousands of customers silent chain products worldwide. Today, Ramsey holds eight patents, numerous registered trademarks, and has representation in more than 70 countries. Contact us to learn more.

THE RZ3 FEATURES A THIRD CENTRAL SUPPORT TOOTH WHICH ENHANCES STABILITY, DURABILITY, AND PERFORMANCE

Innovative third tooth, centrally positioned within the extended pitch conveying chain provides extra support and increased points of contact.

- Flattened Link-Bottom Tips: minimize wear and maximize durability.
- Thicker Links: Greater strength and superior durability.

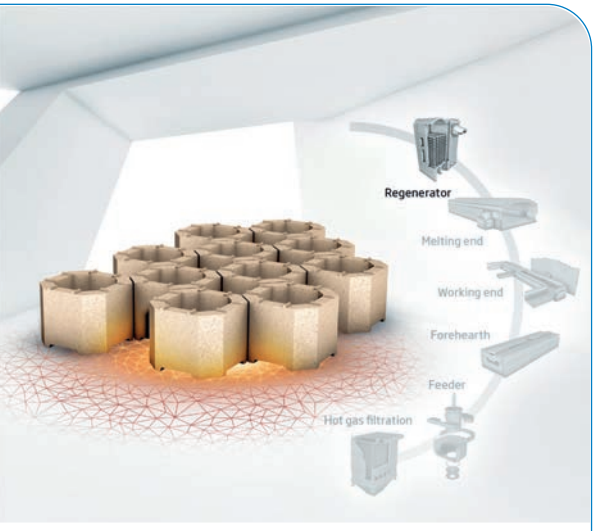
RATH: A reliable full-range supplier for the global glass industry

For 135 years, the international refractories manufacturer RATH has been developing and producing refractory solutions for high-temperature industrial applications. Headquartered in Vienna, Austria, the company manufactures refractory products for operating temperatures of up to 1,800 °C for a wide range of industries and serves customers worldwide through eight production facilities in Europe, the United States and India. Over recent decades, the company has also established itself as a trusted partner to the global glass industry and provides refractory solutions especially for the container glass industry, as well as for manufacturers of flat glass, E-glass, C-glass, tableware, art glass, and specialty glass worldwide.

Today, RATH is a full-range supplier to the glass industry, offering complete refractory concepts for every stage of glass production. The portfolio includes customized solutions for melting tanks, distributors and forehearths, as well as feeder wear parts. RATH has also introduced a complete refractory concept for regenerators, including checker bricks. By combining deep industry expertise with continuous innovation, RATH supports glass manufacturers in optimizing efficiency, reliability and sustainability throughout their operations.

Expanding the portfolio: premium checker bricks, made in Europe

To further strengthen its offering for the glass industry, RATH has recently added premium checker bricks to its portfolio. Manufactured in Europe using high-purity raw materials, these products represent a genuine European alternative for the international glass market.



Developed through intensive research and development and manufactured using state-of-the-art production technologies, the checker bricks combine proven refractory expertise with stable, consistent quality that meets the industry's toughest standards. They are manufactured on a fully automated line, complete with calibration. Thanks to flexible production capacities, availability can be tailored to customer requirements.

RATH checker bricks combine a range of benefits designed to meet the highest operational demands. The high-quality magnesite and zircon-magnesite checker bricks deliver superior chemical resistance, supported by multiple options for fully customized solutions. High durability and outstanding corrosion resistance ensure long-term reliability, even in the toughest environments. Engineered for stability and strength, the optimized geometry also maximizes efficiency by ensuring uniform distribution of flue gases and airflow.

In addition, the checker bricks are designed for quick, straightforward installation and maintenance, helping customers to reduce construction time. An optional PLUS Concept provides basic bricks with a shelf life of up to 24 months, offering greater flexibility in planning and project scheduling.

Driving sustainability with ceramic hot gas filter technology

With tightening emission limits and rising energy costs, glass manufacturers are increasingly looking for technologies that improve environmental performance without compromising process efficiency. RATH addresses this challenge with its innovative ceramic hot gas filter elements, which enable the early removal of dust from particulate-contaminated exhaust gases at high temperatures. The need for inefficient cooling of exhaust gases solely for filtration is eliminated by RATH's ceramic hot gas filter elements. Using these elements improves the energy balance, as the exhaust gas temperature does not need to be lowered and then reheated. It is an approach that offers both ecological and economic benefits.

For many years, the company has developed innovative ceramic hot gas filter elements that enable the filtration of particle-laden industrial flue gases at temperatures up to 1,000 °C, reducing emissions of nitrogen and sulfur oxides, as well as of fine particulates. These hot gas filter elements are manufactured in Europe using RATH fibers and are available in variable lengths from 1 to 6 meters. This technology helps the glass industry meet stringent emission protection requirements in industrial plants. In addition to ensuring compliance with environmental regulations, plant operators can return materials recovered from exhaust air, such as dusts, to the production process, thus improving plant efficiency and conserving raw material resources.

We are stable partners of the leading OEMs and producers at global level in the glass industry and across overall industry sectors in which we operate.

Highlights for the Glass Industry:

- Full range of dedicated high-quality chains, modular belts and components for top-tier cold-end lines
- New imperial standard heavy duty modular belts and dedicated widths chains, 1305 Series
- New gripper chain with GS rubber pad design for bottle-turner applications, best solution for conveying unstable and shaped products
- Unique high-performing solutions for Lube-Free Bottle turner applications
- State-of-the-art product design, engineering and materials (e-SLIDE and SUPREME-S) for guides and curves, offering low wear at high-speed dry running
- Fully proofed low-dusting solutions
- Complete in-house manufacturing and control of overall product portfolio
- More than 1,000 lines installed worldwide

Established in 1919, **Regina** is a world leading developer and manufacturer of high-quality conveyor chains, belts, roller chains and components, offering a complete cutting-edge product portfolio of standard and special applications for glass, beverage, food, packaging and many other industries.

Regina is recognized among the 'fathers' of high-performance conveying and power transmission solutions for the glass industry at global level. We are strongly committed to continuous innovation and development of our value proposition, process capabilities and human capital, with a continuous drive towards sustainability.

Our products are fully developed and manufactured at our premises by means of a wide range of top-tier engineered plastics and steel grades, products available in metric and imperial standards.

SEFPRO, Glass Service, F.I.C. and FlammaTec are playing a key role in the evolution of the offer available to glassmakers over the world.

Our industry is entering a new era. Beyond the sustainability imperative, glass must achieve decarbonization and circularity.

As an enabling partner that embraces every challenge and supports you in your journey to carbon neutrality, at SEFPRO, we provide future-proof refractory solutions to the glass industry.

Because you – our glassmaking customers - face the challenges of producing high-quality low-carbon glass. Because our solutions are critical to your performance and impact, we support you to build the future of our daily life and our planet through carbon-neutrality.

From the birth of the idea in your mind until the next furnace rebuild: we are the end-to-end enabling partner through 4 pillars:

Premium quality

We are committed globally to deliver reliable solutions over the complete lifecycle of furnaces. We are continuously improving our processes for better quality and services.

Innovation

We provide leading high-tech materials and solutions that meet the challenges of our industry.

Customer Centricity

We always are by your side, collaborating hand in hand with our experts and manufacturing at a global level to deliver above expectations.

Our worldwide presence ensures proximity with our customers.

Sustainability

We enable glassmakers both to reduce emissions of current furnace designs and to build the furnace of tomorrow with new melting technologies towards carbon neutrality.

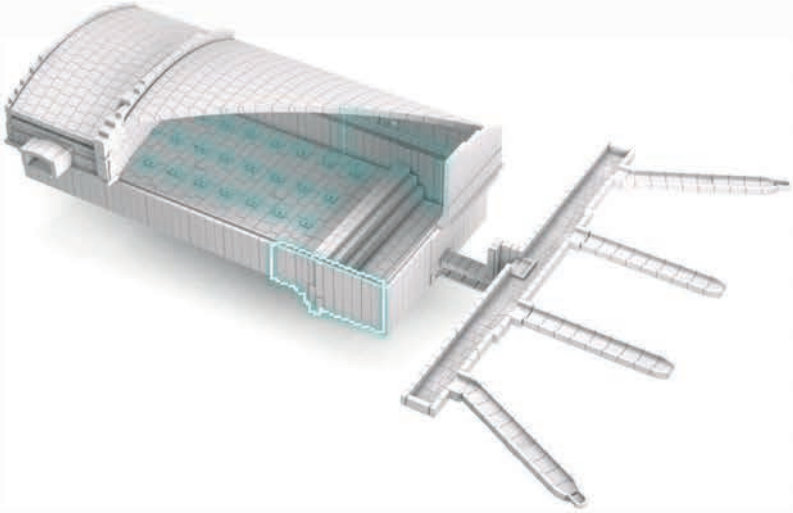
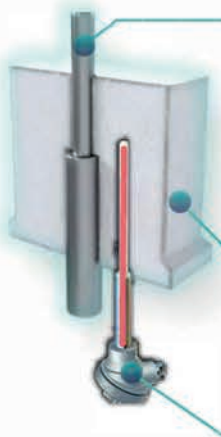
BRIGHTER SOLUTIONS TOGETHER

XeBOOST™ refractory & electrode holder

XeBOOST™ refractory, a 46 % ZrO_2 high-resistivity AZS designed for high-boosting furnaces in combination with F I C differentiated electrode holders and SEFPRO GUARD monitoring.





F.I.C. HIGH-Q and MAXI-Q:
- **Reduced risk of water leak** to glass and refractory
- **Less clogging occurrence**
- **Higher cooling capacity** of the Mo electrode
- **Lower heat exchange** with the refractory

SEFPRO XeBOOST™ refractory 46 RT:
- **15% higher corrosion resistance** vs AZS40
- **3 times higher electrical resistivity** vs AZS40

SEFPRO GUARD© Monitoring
Temperature alerts

Increasing boosting leads to severe operating conditions of side walls:
- **15% higher corrosion resistance** vs AZS40
- **3 times higher electrical resistivity** vs AZS40
- Electrical boosting leads to a **change in corrosion profile**
- Corrosion point is shifted **toward the bottom** of the block
- More severe corrosion stresses **in refining area**

With two manufacturing facilities in full operation, one in Plovdiv, Bulgaria and the other in Locate Varesino, Italy, **SIGMA Group** is today one of the major players in the manufacturing of refractory products for the glass industry.

We operate globally selling more than 80% of our production abroad.

We can supply the complete range of materials for glass furnaces from Fireclay to Sillimanite, Mullite, High alumina, Zircon-mullite, Zircon, Magnesia based materials, Silica and Fused cast.

Our commitment to technological innovation, quality and flexibility at our facilities drives our business and competitiveness in the market.

With the recent installation in Plovdiv of a next-generation electric furnace capable of reaching an intense 1750°C, SIGMA sets a new standard in sustainable refractory manufacturing combining advanced engineering with a firm commitment to environmental responsibility. This furnace dramatically cuts CO_2 emissions from our production sintering with a near-zero carbon footprint.

This project is only one part of our multifaceted green transition. Recent installations of photovoltaic systems generating 900,000 kWh per year and smart energy solutions are cutting carbon emissions by a further 480 tonnes annually.

SIGMA Group has shown its leadership with action – offering tangible progress toward a more sustainable world.

Glassmakers worldwide choose the comprehensive applications and support framework of **SKS** to optimise the performance of their furnaces and minimise downtime. We are one third of the industry-leading SORG Group. From installation and inspection to repairs and replacements, our single-source approach enables us to deliver safe and innovative turnkey projects that help extend the lifecycle of every furnace.

Construction

SKS provides a turnkey approach from decommissioning to furnace start-up and everything in between, including complete steel construction for example. Working with furnace designers, we deliver our projects to schedule and exacting safety standards.

Maintenance

We can offer frequent furnace maintenance to keep your assets in optimum operating condition. Our maintenance team has earned a leading reputation for all kinds of ongoing works like pushing or exchanging electrodes, closing of sting outs and overcoating of tank blocks.

Repairs

SKS is a specialist in hot repairs to secure and extend the furnace lifetime. With ceramic welding and repairs during furnace operation, we can help to minimise disruption and downtime.

Furnace Audits

We have a variety of inspections to determine the current condition of your furnaces. These include visual and endoscopic inspections, as well as test drillings to assign the refractory thickness of the melting end bottom.

Worldwide Presence

With a wide network of local offices for SKS subsidiaries and strategic partners, our scope of services is available anywhere in the world.

Experience

Combining over 140 years of experience working in the most demanding conditions, our team has an unrivalled application knowledge and expertise in operational furnace repairs, maintenance and constructions.

Responsible for designing the world's most advanced furnaces and related technologies, our tireless commitment to research and development supports glassmakers in improving the sustainable performance of their furnaces to maximise asset lifespan.

SORG'S MISSION

We are the one and only partner for the glass industry who has not only developed the next generation of sustainable melting technologies, but has brought this revolutionizing furnace – the CLEAN Melter® – in successful operation. Another important step to enable glassmakers to produce net zero glass at volume is the newly developed 100 % electric VIKING® glass conditioning system which was introduced successfully into industrial application.

Technology

SORG is the globally acting furnace company with an innovative successful research and development department for glass melting and conditioning which supports the glassmakers with future technologies. Our tireless commitment to to innovation includes mathematical modelling, modern design tools and digitalisation.

Services

SORG is committed to unrivalled customer support over the lifecycle of a furnace. Our in-house specialists offer glassmakers service and assistance for a smooth operation and any glass or melting problems.

Innovation

SORG believes in the continued pursuit of innovation, working in close partnership with our customers to understand their needs and develop high-quality answers that enhance industrial glass production.

Applications

Every kind of glass requires a different type of furnace. That's why each furnace has a unique design and special features – and we can produce them all according to customer requirements.

Founded in 1946, **Strada** is the oldest European company in the glass mould industry and an established Italian manufacturer of moulds for IS glass forming machines. With 80 years of specialization in the design and production, the company has become a recognized leader in the manufacturing of glass containers across a broad range of end markets, including mineral waters, wines, beers, spirits, soft drinks, food, pharmaceuticals, and cosmetics. Serving leading glass producers worldwide, Strada combines deep technical expertise with a direct, service-oriented approach that covers every stage of the project, from initial design brief to final delivery.

Production is built around fully customized multi-axis turning and milling centers. Automated design workflows, integrated machine communication systems, and robotic engineering deployed across all equipment work together to reduce lead times, minimize human error, and ensure consistent output quality, from the first prototype through to series production.

Continuous investment in Research and Development keeps Strada at the forefront of mould technology. New forming solutions, material improvements, and process optimizations are developed in close collaboration with each client, tailored to their specific operational requirements and aimed at measurable gains in efficiency, quality, and time-to-market.

This customer-focused approach, combined with almost a century of manufacturing know-how and a culture of precision that runs through every level of the organization, is what has made Strada the reliable long-term partner for the global glass industry.

A partnership built to last: today, and for another 80 years to come.

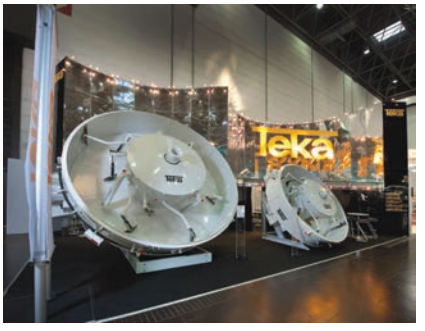
Product Range

- **MIXERS**



TEKA Maschinenbau GmbH, established in 1961, is the manufacturer of the internationally reputable TEKA glass batch mixer, and one of the leading glass mixing equipment specialists worldwide.

We specialize in the engineering and manufacturing of a complete range of glass batch mixers from 250 liters up to 7,500 liters capacity for the highest demands in all glass mixing applications. TEKA mixers have an outstanding reputation for mixing performance, reliability and ease of use in combination with an exceptional service life.

Decades of know-how and technological innovation guided by in-the-field experience under severest conditions and a strong customer commitment have made TEKA one of the leading manufacturers of glass batch mixers worldwide.

We have supplied glass batch mixers to the most reputable and advanced glass manufacturing companies worldwide into all glass batch mixing applications.

TEKA batch mixers can be installed in any new or existing glass manufacturing facility and due to its compact size are perfectly suitable for retrofitting into any existing batch house.

Our after-sales service, which includes spare parts service and the TEKA technical service teams, provide customers with an extremely reliable and timely spare parts supply.

TEKA has a spare parts inventory that is second to none in the glass mixer business. Our spare parts and service teams consist of professionals with many years of experience. TEKA service technicians are highly skilled and very knowledgeable, often with decades of field experience. During site visits, they can instruct on maintenance and operation of the mixers.

As a family-owned company, our philosophy is not so much directed towards growth but rather to continuously aim for high standards, thereby providing exceptional customer value throughout the decades.

TEKA has wholly-owned subsidiaries in North America, France, Spain, Poland and China and a worldwide distribution network provided by professional and long-standing partners.

TEKA Batch Mixer Advantages:

- outstanding homogeneity performance
- exceptional reliability and robustness
- tremendous life-cycle period
- perfect for retrofitting due to compact size
- intelligent mixer design simplifies maintenance and cleaning
- professional TEKA after-sales service teams

- **DESIGN AND CONSTRUCTION OF GLASS FURNACES OF ALL TYPES**
- **FOREHEARTH AND WORKING END TECHNOLOGY**
- **GLASS PLANT EQUIPMENT INCLUDING ELECTRODE HOLDERS AND ELECTRIC BOOST SYSTEMS**

Recognised as a global innovator in glass plant engineering and contracting, the **TECO Group** has been designing, building and modernising since 1927. Originating as an engineering and construction company focused on designing and building glass melting furnaces, TECO has since extended its capabilities to include turnkey glass plants, glass process design, modelling and analysis, forehearths and working ends, batch plants and glass plant equipment. Utilising a full range of in-house expertise, the TECO Group continually pools its knowledge and works together to innovate and improve glass plant operations, helping customers minimise production costs whilst maximising glass quality and product pack efficiency. With an ever-evolving industrial landscape, consideration is given to factors such as product type, glass quality, fuel efficiency, energy savings, sustainability and environmental compliance. With its five Group companies located over two continents and industry representatives strategically positioned around the globe, the Group is well-placed to serve many of the world's primary glass manufacturing industry.

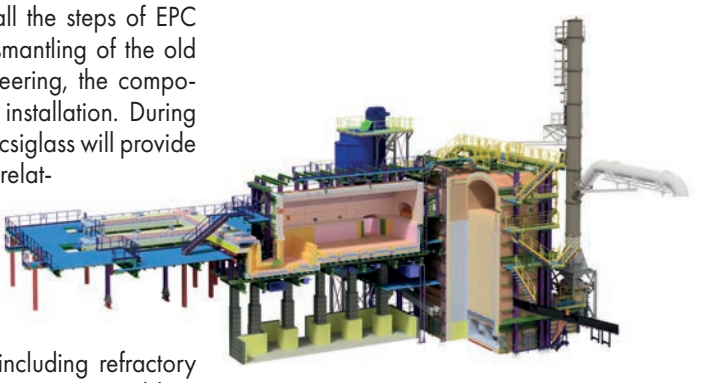
ANNUAL COMPANY TURNOVER

EUR 12,000,000 - 14,000,000

Established at the end of 2018, **Tecsiglass** operating center is based in Genoa. Main core of the activity is the design and supply of glass furnaces or parts (carpentries, refractories, equipment). The Company, through its worldwide connections, can provide for all the services required for the reconstruction and the start-up of the furnaces. Despite the recent start-up, Tecsiglass can account on the consolidated technical experience of the professionals who have been operating in the glass and steel industry for decades.

Tecsiglass covers all the steps of EPC projects: from the dismantling of the old furnace to the engineering, the componentssupply and the installation. During furnace operation, Tecsiglass will provide for all the services related to hot repairs and other maintenance. Tecsiglass is fully organised for the management of turnkey projects (including refractory supplies) and for maintenance and hot-repairs of glass furnaces and other industrial furnaces (lime-cement-rotary kilns-etc). Our team is composed by a wide range of skilled professionals with main refer-ence to furnaces engineering and instal-lation. We are actively working in the most challenging research fields (energy saving and emission reduction) through our experts in cooperation with some relevant industrial companies.

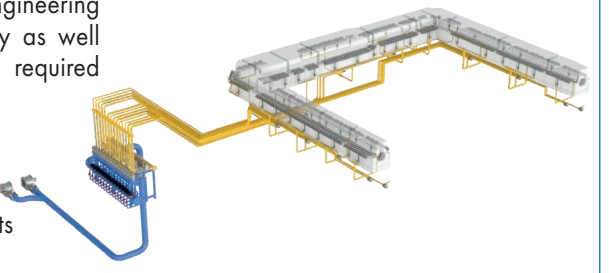


ENGINEERING AND SUPPLY

Tecsiglass Project Team

Can provide for all the engineering services of the Glass Industry as well as for the supply of all the required components:

- Factory lay-out
- Refractory materials
- Steel structures
- Electro-instrumental plants
- Equipment
- Electric Boosting
- Software development and personnel training
- Engineering and project implementation for new IS machines and cullet recovery.
- Operational manuals
- R&D Simulation



Focus On

- Batch plant
- Furnace
- Working end & forehearth
- Fume purification(Electro-filter - Denox)

Equipment and Systems

Tecsiglass projects and supplies specific Equipment for the Glass industry.

Some examples:

- Combustion plants for furnace, working end and forehearths
- Cooling and ventilation systems
- Utilities management (water, fire-fighting and fluid distribution)
- Raw material stocking and mixing systems
- Electro-instrumental systems
- Power systems

Service

- Demolition
- Steel installation
- Refractories installation
- Equipment installation
- Systems installation
- Furnace Audit
- Combustion optimization

Hot-repairs

- Overcoating
- Hot Sealing
- Crown repair
- Crown Casting
- Hot Vacuum & cleaning
- Forehearth hot repairs
- Superstructure hot repair
- Regenerator checkers thermal cleaning
- Furnaces audit
- Electrode pushing
- Bottom drilling for thermocouple installation

REFRACTORY SUPPLY

Tiama is a global provider of real-time process data and quality controls for the glass packaging Industry.

The company's machines are filled with sensors installed throughout the production line, capturing high value data from both the hot end and cold end. This data, combined with Tiama's traceability expertise, provides manufacturers with a powerful tool to optimize production and prepare for the transition towards smart factory operations.

YOUniverse intelligent glass solutions

To better prepare future Business Intelligence capabilities, Tiama has structured its unique offer around six product families:

- **Intelligence:** all production and quality data are recorded and displayed in one smart database that enables to have optimized production management and immediate actions.
- **Monitoring:** modular and affordable technological bricks at the hot-end provide process information at the earliest stage of the bottle's life and detect early production drifts.
- **Traceability:** with the patented device Total Tracer engraving an individual code on the bottle. All defects information and events at the H-E and C-E will be correlated down to a single container creating a unique identity card for each ware.
- **Inspection:** with the development of flexible and automated machines. At Tiama, advanced technologies such as learning processes, deep learning and artificial intelligence are being pushed, with machines to provide operators with precise data in the fastest possible time.
- **Service:** with a panel of support programs giving the possibility to use all the Tiama equipment at their highest performance rates, maximizing initial investments. Tiama Support also includes predictive and preventive solutions to reduce costs of ownership.
- **Sampling:** either at the H-E, C-E or at the Laboratory, TIAMA develops new sampling solutions. One of them, the Tiama Xlab is a revolutionary machine which uses Xray technology to create a 3D mapping of the container.

Ultimately, based on this powerful database, Tiama will develop data mining solutions, and will build business models around correlations between all the parameters of a glassplant. This is why Tiama created its Smart Factory Concept called YOUniverse and has, in fact, already started to work on customer cases attesting the value of these correlations.

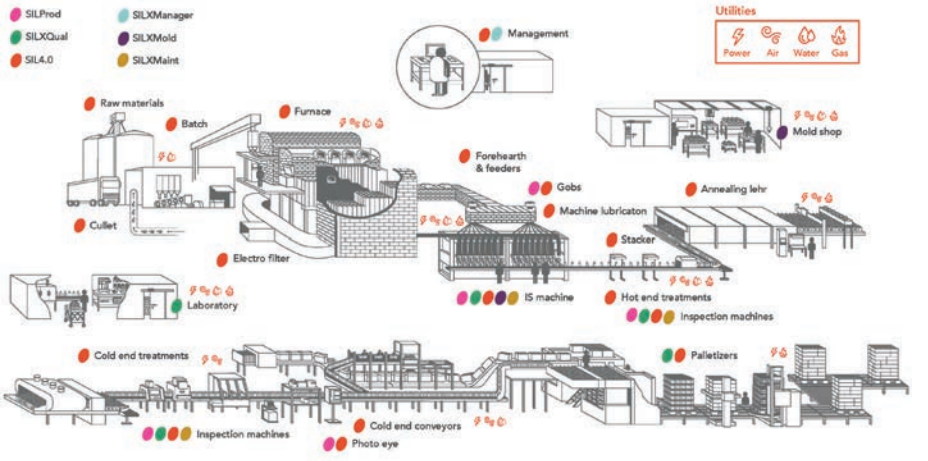
For 30 years, **Vertech'** has been the reference provider of software solutions for the glass industry. With a wide range of products, SIL provides glassmakers with very precise, real time KPIs on the performance of whole plants. Thanks to all this shared data and the full traceability of products, production rates improve, losses decrease and customer risks are reduced. With 25% invested in R&D yearly, Vertech' is constantly innovating and adapting SIL to current industrial needs. More than 750 production lines have been equipped with SIL so far in 35 countries all over the world.

SIL is a Manufacturing Execution System (M.E.S.) intended for glassmakers producing:

- Hollowware
- Tableware
- Tubes
- Decoration

SIL can be installed everywhere in the glass plant, but also at the headquarters from where all KPIs of several plants can be viewed simultaneously.



Trustworthy collaborations with partners and customers

Thanks to trustworthy collaborations with partners, SIL is an independent system that's capable of being connected to any production and inspection machine available on the market.

Besides being a very complete system, SIL includes an individualized follow-up, an annual maintenance contract, on-site installation and customer service.

Vertech' is there every step of the way from the first technical visit and to the installation process to full system implementation and on-site training. Vertech' customer support is available during office hours (GMT+1), with an optional subscription to the 24/7 hotline for technical support. For long-term system optimization, Vertech' offers expert maintenance service on-site with yearly updates.

Vetromeccanica, established in 1992 in the province of Parma, the heart of the Italian packaging area, has been an important industrial international player right from the very beginning.

With 30 years of expertise in containers handling, Vetromeccanica is a reliable partner during all the phases of the process: from feasibility studies, executive engineering, the choice of the best supplies, right up to the supply of innovative, patented and competitive handling and automation solutions to meet specific needs.

In-house management of all the phases of the production cycle guarantees high quality products 100 % Made in Italy, short delivery times and competitive prices. Vetromeccanica aftersales service offers the best support in any situation with its prompt response thanks to a well-stocked spare part warehouse.

Extensive expertise, advanced technologies, and utmost reliability make Vetromeccanica an efficient and practical partner that never makes a company feel left out in the vast and complex hollow glass industry.

Vetromeccanica offers Cold End Lines from lehr exit up to palletizing units for the handling of glass containers of different sizes and shapes.

Video Systems is specialised in the design and construction of high-tech sensors, vision and quality control systems for the main industrial sectors. Flexibility and dynamism guide the company's work, while constant research allows Video Systems to develop high quality control systems where innovation offers concrete and customised solutions to meet the specific requirements of the customers. Video Systems develops advanced technology solutions thanks to its extensive expertise in **Artificial intelligence** since 2001: Video Systems solutions learn directly from the production line, with great advantages in terms of reliable results and cost reduction. Being specifically designed for the end user, Video Systems technology assures high performance and great ease of use. One of the most important sectors for the company is the hollow glass market, and **Imago** is our complete range of **advanced systems for in-line quality control in hollow glass production bottles**, jars, etc. **Imago** systems are designed for contactless inspection of products: they have been **enriched with Artificial Intelligence and developed to guarantee fault-finding of any kind of defect, while reducing false rejects to the minimum**. This equipment has been developed in cooperation with major hollow glass manufacturers, according to the requirements of special hollow glass production lines. Imago connection technology guarantees that all machines are equipped both with advanced connectivity regarding remote assistance and monitoring and connection, and with corporate management systems. High-tech, outstanding performance, ease of use: this is the Imago world. Video Systems supplies **customised solutions** with a flexible approach that characterises the company's range of quality control systems. The company is specialised in the construction of models and simulations to find the right solution that matches customer needs, starting from the data supplied and an accurate study of the production line. This allows Video Systems to design and implement a **selected control system based on customer specification**. This operating method has been applied for years and, according to defined protocols, guarantees a top-quality service in terms of product and assistance.

THE WORLD IS CHANGING GLASS QUALITY CONTROL TOO.

The new generation of vision technologies and **artificial intelligence** developed by Video Systems **since 2001** takes glass quality control to a new level:

- Hyper personalization
- Minimization of false positives
- Intelligent online self-learning
- Advanced control and traceability
- Reduction of energy consumption
- Predictive condition monitoring
- Servitization for quality

INNOVATIVE SOLUTIONS FOR YOUR SUCCESS

Our customer base operates in tableware, cookware, food storage, floral and candle, glass blocks, glass insulators and technical glass applications, such as washing machine windows and optical glass.

WORLD'S NO.1 LEADING PLANT TECHNOLOGY FOR THE GLASS INDUSTRY

LEADER IN INNOVATION, TECHNOLOGY, SUSTAINABILITY & COST-SAVING

Our family-owned company is a leading manufacturer of fully automated and electronically controlled production lines – from feeder up to annealing lehr.

Guaranteed quality through in-house manufacturing safeguards the best possible result, driven by our family heritage. Over time we have been successfully migrating our state of the art pressing, blowing, spinning, handling and fire polishing solutions into more than 250 manufacturing locations around the globe.

Driven by innovation, our teams work around the clock to re-engineer and upgrade your glass forming processes using the latest available machine and process technologies.

Transforming your Hot End operations through improved resource efficiencies, reduced energy consumption and higher efficiencies is our key challenge.

Our team of experienced engineers and fitters delivers worldwide support for process design, machine development, productivity improvement, commissioning and start-up services.

WBT is a leading manufacturer of conveyor belts and cutting blades for the glass industry, selling to major European OEMs and production powered by solar energy

With over 40 years of experience, **WBT is a leading Italian manufacturer of high-quality conveyor belts** for various industrial applications. Our expertise extends beyond the glass sector, offering solutions for a wide range of industries.

WBT is also renowned for producing cutting blades for glass. Our blades, characterized by an excellent quality-price ratio, are an ideal entry point to experience WBT's expertise and reliability.

Why choose WBT?

- **Extensive experience**: Over 40 years in the manufacturing industry.
- **Diversified expertise**: Conveyor belts for various industrial applications.
- **Guaranteed quality**: Cutting blades and belts of the highest quality.
- **Customer-oriented approach**: Customized solutions to meet your specific needs.
- **Selling to major European OEMs**: We collaborate with leading European machine manufacturers.
- **Solar-powered production**: Commitment to environmental sustainability with the use of solar energy in our manufacturing process.

Our core business is the development and construction of batch and cullet plants.

We pride ourselves on being amongst our customers' most reliable partners with the infrastructure, expertise and capability to deliver projects of any magnitude.

As one of the few full-service providers in our industry, our spectrum covers all service areas within plant construction – engineering, planning, design, production, automation technology, installation, site management for all disciplines, commissioning, training for personnel, and services for ongoing operations.

Be it flat glass or hollow ware, Zippe batch plants ensure that the batch for every glass type is fully automatically fed into the furnace with the exact consistency and homogeneity needed, at the required amount and at the right point in time – 24 hours a day, every day.

State-of-the-art control technology is a key element for optimal operation of a batch plant. There are around 40 Zippe automation and control systems specialists hard at work for you. This means we are one of the few companies able to develop complete control systems in-house.

Our 24-hour support service enables our customers to contact an expert around the clock either by phone or email.

Zippe has been focused on the future for more than 100 years and, having realized well over 650 batch plant projects, has the longest standing experience in our industry sector.

Zippe – right from the start.

YOU'RE THIS CLOSE

... TO IDEAL PLANT SERVICE AND MAINTENANCE

Imagine a smart service & maintenance system with which all relevant data and information about your plant is available digitally at the touch of a button – 24/7. That's zmart®360°: short response times; faster resolution of technical questions; more efficient, paperless documentation; enormous time savings thanks to direct and fast access, allowing you to minimize downtime and work more efficiently.

Batch Plants · Cullet Plants · Automation · Engineering · Modernization · Factory Cullet Recycling · Glass Recycling · Batch Charging · Preheating · Audits · Maintenance & Service

Glass Magazines

1988

glass machinery world plants&accessories
BI-MONTHLY INTERNATIONAL MAGAZINE FOR GLASS MANUFACTURING

GLASS MACHINERY PLANTS & ACCESSORIES is the leading international magazine for glass manufacturing, and is targeted at glassworks involved in the production and processing of hollowware and special glass (bottles, containers, household, lighting, technical, scientific, industrial and medical glassware).
GLASS MACHINERY PLANTS & ACCESSORIES is a bi-monthly periodical with about 100 pages of product news, current world news, focus on..., technical articles and dossiers, worldwide exhibitions, glassworks in the world, Yellow Pages, etc.

1989

Glass-Technology International

GLASS-TECHNOLOGY INTERNATIONAL is the leading international magazine for professionals involved in the flat and bent glass industry, from building to automotive, and from furniture to household appliances. **G-TI** is useful for those working in float glass plants as well as glass processors/fabricators, glazing contractors, automotive glass installers, window and door manufacturers, glass merchants, wholesalers, etc. With about 100 pages per issue, it is the bi-monthly tool for keeping abreast of new technology, new products, company life and all innovations in the world of flat and bent glass.

Annual Guides

1990

Glass Industry Directory 2026

The **GLASS INDUSTRY DIRECTORY** is a unique international annual guide which gives a complete overview of international glassworks and suppliers involved in hollowware and special glass manufacturing. About 300 pages of complete company profiles: addresses, management, sister companies, plants, number of employees, turnover, banks, year of company foundation, capital, trademarks, areas of activity, innovations, product-by-product and country-by-country breakdowns. The **GLASS INDUSTRY DIRECTORY** is the annual reference point for the international glass manufacturing industry comprising bottles and containers, domestic glassware, tubing, vials and ampoules, lighting glassware, technical and industrial glassware, scientific, laboratory and medical glassware and much more.

2013

FLATGLASS 2026 world directory

The **FLAT GLASS WORLD DIRECTORY** is a unique international annual guide providing a complete overview of glassworks and suppliers for the flat glass sector. More than 300 pages of company profiles and information about worldwide glassmakers, glass processors and suppliers, including addresses, management, sister companies, plants, number of employees, turnover, banks, year of company foundation, capital, trademarks, areas of activity, innovations, sales network, exhibitions, and, of course, interactivity in digital format, make the **FLAT GLASS WORLD DIRECTORY** the annual reference point for the international flat glass industry.

Glass Magazines

1989

Glass-Technology International

GLASS-TECHNOLOGY INTERNATIONAL is the leading international magazine for professionals involved in the flat and bent glass industry, from building to automotive, and from furniture to household appliances. G-TI is useful for those working in float glass plants as well as glass processors/fabricators, glazing contractors, automotive glass installers, window and door manufacturers, glass merchants, wholesalers, etc. With about 100 pages per issue, it is the bi-monthly tool for keeping abreast of new technology, new products, company life and all innovations in the world of flat and bent glass.

WWW.FLUORITAL.COM

FLUORITAL has made its eco-sustainability policy a *true pact with the planet*, sealing this pact thanks to its environmental certifications.

For *over 60 years* it has been the main reference in the sector of **high quality paints** and inks for glass, plastic and metal; as well as a pioneer in non-flammable water-based products, with cross-linking at low temperatures and with low contents of volatile organic compounds.

HEADQUARTERS: Fluorital S.r.l. Via Roma 54, 31020 Villorba Italy | info@fluorital.com
FLUORITAL GROUP: FRANCE - USA - ITALY - POLSKA

Great partnerships are built over time.

By combining expert guidance, practical support and continuous learning, we empower our customers to navigate challenges, seize opportunities and achieve their goals.
