

# The stellar expertise accompanying **B SOLUTION** machine manufacturing

Dedicated to providing high-quality solutions that meet the evolving demands of the industry, B SOLUTION shines as a leader of glass processing innovation. For glass intended for architectural marvels, automotive applications, furniture or specialised uses, the company's advanced technology enables customers to meet stringent specifications to achieve a superior finish.

## **A** **COMPREHENSIVE PRODUCT RANGE**

BSolution offers a diverse array of products tailored to modern glass processing needs, from

automated loading systems to vertical precision grinders. Each machine exemplifies reliability and innovation as BSolution continuously sets new

technological standards. Aiming to deliver comprehensive solutions that enhance efficiency and quality in glass production, the company's mission extends beyond providing machinery.

### **PIONEERING TECHNOLOGICAL ADVANCEMENTS**

BSolution's machinery empowers customers to

elevate their glass production to very high levels of excellence - anticipating market trends while adhering to the strictest environmental standards. Here the araising and rough-grinding sections are prime examples of the company's expertise - reflecting its commitment to quality and safety. Arrising prevents dam-

age and cracks just as rough-grinding provides the necessary surface for further treatments or industrial applications.

### **OPTIMIZATION THROUGH DESIGN**

BSolution's machines integrate these essential techniques to streamline the glass production process, boosting both efficiency and safety. Utilising state-of-the-art technology, these solutions ensure precise araising and effective rough grinding - significantly reducing processing times and

extending the lifespan of finished products.

### **SPEED ARRIS AS PINNACLE OF PRODUCTIVITY**

At the pinnacle of BSolution's offerings is the SPEED ARRIS arrising/rough-grinding machine, which delivers:

- High productivity in vertical arrising
- High productivity in vertical rough-grinding
- Seamless integration into IGU lines
- Compatibility with washers for tempering furnaces

- Versatility as a stand-alone installation
- Customization to meet specific needs

It can be tailored to customer requirements with a variety of options, including:

- Z-axis double/triple tool configuration
- Adjustable working height kits
- Customised dimensions
- Planned technical assistance
- Extended warranties
- Advanced interconnec-

- tion systems
- Centrifugal systems
- Shape processing capabilities
- Turbo conveyor and blower systems
- Pre-washing systems
- Specialised tool sets
- Boost inverters for PVB glasses

- Barcode systems
- Language customization
- Personalised colour options

BSolution's commitment to innovation and excellence ensures that its glass processing machines not only meet industry expectations but also exceed them - paving the way for higher standards in glass manufacturing in the future.
